ANTICOR company is one from greatest suppliers of self-adhesive tapes and protection coatings on the Central Europe market since 1991. We offer the highest quality materials for branches as follows: electro technical, HVAC & air-conditioning, heat engineering, builder's, automotive, gas & fuel, chemical, water supply & sewage.

Our offer:

1. Tapes and electro technical materials: Electrix, Bishop.
5. Trainings - we manage theoretical and practical trainings finished with the test checking, ended by certificate edition from the range of general corrosion problems. We organize technical symposiums and meetings.

We invite you to visit our websites:

www.anticorray.pl

www.syntetix.pl
www.anticorcim.pl
www.helptape.com
EXAMPLES

1. **The Air Flue** - The thermal insulation.
   - Aluminium tapes 301, 353

3. **The External Air Flue** - Aluminium tapes 360-35, 360-17

4. **The Repair of Burst Buffer** - Duct tapes: Polytex help tape

5. **The Window - Frame** - UV-resistant, waterproof masking tape 621

6. **The Wall Passes** - ANTICOR Seal

7. **The Flanged Connection** - ANTICOR Plast system

8. **The Marking/Location of the Pipeline** - Rating Foil 251, 253

9. **The Insulation of Cables** - Electric tapes

10. **The Repair of Burst Buffer** - Help tape

11. **Protection for Underground Earthing System** - 701-40

12. **The Flue** - High temperature aluminium tape 340HT

13. **The Joining of the Thermal Insulation** - PE or PUR Insulation tape 422

14. **Marking of Stairs / Ceilings** - Marking tape 631

15. **Securing the Area** - Warning tape 255 white & red

16. **The Window - Frame** - Polytex help tape

17. **The Wall Passes** - ANTICOR Seal
ELECTROTECHNICAL TAPES FOR LOW VOLTAGE

**ELECTROINSULATION**

**200 PREMIUM**

Premium quality PVC Electrical Tape, thickness 0,18mm, self-extinguishing, frost resistant, waterproof, UV and ageing resistant, high resistant to water, soap solutions, oils, acids, alkalis and corrosive chemicals, very elastic. Available in 5 different colours and in multi-coloured sets.

**201**

COLOUR: black, blue, red, green, yellow, brown, white

Size: 15, 19, 25 i 50mm x 18.3m

**202 SuperFlex**

Top quality PVC Electrical Tape, thickness 0,19mm, very elastic, resistant to: weather, abrasion, moisture, acids, corrosion, UV and ageing, self-extinguishing. Available in 10 different colours and in multi-coloured sets.

**211**

COLOUR: black, white, green, blue, violet, yellow, brown, red, yellow-green, grey

Size: 15mm x 10m, 19mm x 20m + rainbow 15mm x 10m, 19mm x 20m

**221**

COLOUR: black with blue liner

Size: 19mm x 3.5m • 19, 25 i 50mm x 7.5m

Self adhesive, Self-amalgamating Double Sided, Electrical Tape, self-fusing, thickness 0,60mm, 3-layers, butyl rubber with a central polyethylene (PE) layer. Waterproof and resistant to corrosion and ageing, apply with 5% elongation.

**222-PIB**

COLOUR: black with purple liner

Size: 19mm x 3.5m • 19mm x 7.5m

Self adhesive, Self-amalgamating polyisobutylene based medium voltage tape possessing excellent electrical, chemical and physical properties, self-fusing, thickness 0,76mm, resistant to deterioration, waterproof, applied with 100% elongation. Especially suitable for the insulation of very thin wires in areas with poor access.

**PROTECTIVE**

**160**

COLOUR: black

Size: 19mm x 10m

Woven Fabric Tape, thickness 0,25mm. Especially resistant to stretching and breaking. Adheres well to uneven surfaces. Wide constant operating performance range from -40°C to +105°C.

**277**

COLOUR: white

Size: 19mm x 10m • 19mm x 20m

High temperature and high mechanical strength Electrical Tape. Provides excellent tear and abrasion resistance with a service temperature rating of 130°C, with thermosetting adhesive.

**BT**

The Splicing Kit for making muffs and repairing insulation of LV cables. Special advantages: each component is easy to use, gives the possibility to repair damaged cable without the section of all wires. Contains all dispensable auxiliary materials.

ELECTROTECHNICAL TAPES FOR MEDIUM VOLTAGE

111 COLOUR: black
SIZE: 19mm x 20m
PVC professional grade, pressure sensitive Vinyl Electrical Tape, thickness 0,18mm, very elastic, resistant to: abrasion, moisture, acids, corrosion, all weather, UV and ageing. Self-extinguishing, flame retardant, gives excellent performance over a wide range of temperature -18 to +105°C. Can be used as primary insulation for splices up to 600 Volts. Used as a protective outer jacket over splices and for all low temperature application.

85 COLOUR: black
SIZE: 19mm x 20m + 25mm x 33m
PVC professional grade, pressure sensitive Vinyl Plastic Electrical Tape, thickness 0,22mm, very elastic, resistant to: weather, abrasion, moisture, acids, corrosion, UV and ageing. Self-extinguishing, flame retardant, gives excellent performance over a wide range of temperature -18 to +105°C. Can be used as primary insulation for splices up to 600 Volts. Used as a protective outer jacket over splices and for all low temperature application.

W963 COLOUR: black
SIZE: 19mm x 9m
Ethylene propylene rubber (EPR) High Voltage Tape, thickness 0,76mm, possessing excellent electrical, chemical and physical properties, resistant to: UV and ageing, moisture, acids, corrosion. Self-amalgamating tape that maintains a tight insulation build-up for void free electrical stability and permanent resistance to moisture penetration. The excellent stretch permits fast taping speeds and uniform build-up with normal taping techniques, is compatible with all extruded dielectric cable insulations. For insulating and jacketing of splices on power cable from 600 volts through 69,000 volts and for building stress cones and jacketing of terminations on power cable from 600 volts thru 35,000 volts. Due to its high stable mechanical and chemical properties, is ideal for cable jacket repair and restoration.

L969 COLOUR: black
SIZE: 19mm x 9m
Linerless EPR High Voltage insulating and jacketing Tape, thickness 0,76mm, possessing excellent electrical, chemical and physical properties, resistant to: weather abrasion, UV and ageing moisture, acids, corrosion, flame retardant. Self-bonding tape that permits much quicker taping speeds than a tape with a liner and yields a uniform, void-free build-up. The excellent stretch of tape allows conformability to the most complex shapes and contours. L969 is compatible with all extruded cable insulations and is specially formulated to have excellent thermal conductivity that will allow the heat to dissipate from a joint. It is flame retardant and meets typical industry standards. For insulating and jacketing of splices on power cable from 600 volts through 69,000 volts and for building stress cones and jacketing of terminations on power cable from 600 volts thru 35,000 volts. Insulate and protect bus bars and joints.

20 COLOUR: grey
SIZE: 25mm x 9,1m
Silicone rubber Electrical, self-amalgamating Tape, chemically cross-linked silicone rubber tape, triangular in cross-section and featuring a centerline for precise half-lapping. Track and erosion resistant, oil & UV resistant, fuses into a solid mass within minutes of application.

20 Psylis employs no adhesive coating, offering a non-contaminating self-cleaning surface which maintains a high tracking resistance. Temperature rating 180°C. Used for jacketing of high voltage terminations on extruded dielectric cables thru 69,000 volts. For insulating high temperature silicone insulated cables. A positive oil stop in the construction of transition splices.

17 COLOUR: black
SIZE: 19mm x 4,6m
EPR based, self amalgamating and conducting tape, very elastic with good conducting properties, resistant to: moisture, acids and solvents, corrosion, weather, UV. Its unsupported construction makes it ideal for use on power cable where accommodation of expansion and contraction due to load cycling is important. The excellent stretch of tape allows conformity to complex shapes. Is compatible with all extruded dielectric cable insulations. Used for electrostatic shielding on high voltage splices and terminations. Filling indents in compression connectors and rebuilding strand shielding on high voltage splices. Shielding bus and overhead connections.

125 COLOUR: black
SIZE: 38mm x 1,5m
Electrical Filler Tape is a butyl based insulating compound in a 1/8” thick tape form designed for quick, highly elastic, resistant to: UV and ageing, acids, corrosion, all weather. Highly moisture resistant, cost effective insulation build-ups. 125 is a self-amalgamating compound that can be readily compressed and easy molded by hand to conform to irregular shapes, used in conjunction with other insulating tapes for complete installation. Used for rapid insulation build-up thru 5kV. Do not corrode copper or aluminium. Can be used as a primary insulation for connections up to 5kV in conjunction with high voltage insulating tape or vinyl plastic electrical tape. It is ideal for covering split-bolt connections, padding bus-bar edges and connections, and sealing switchgear and transformer terminals.

15 COLOUR: black
SIZE: 25mm x 4,5m
15 Plybraid an all-copper knit-mesh designed to allow excellent conformability when hand-applied in the field. Special knit design allows easy application and provides positive metallic shielding. Used for high voltage insulation shielding for splices and terminations of shielded cables.

**ALUMINIUM TAPES**

**301**  
Utility grade aluminium foil tape. Used in HVAC industry for joining and sealing Foil-Scrim-Kraft Facing laminated fiberglass blanket, duct board joints and seams, joining and sealing flexible air duct seams and connections. General purpose: holding, patching, sealing and masking applications - indoors & outdoors.

**353**  
High quality foil-scrim aluminium tape with acrylic adhesive. Used in HVAC industry for joining and sealing Foil-Scrim-Kraft Facing laminated fiberglass blanket, duct board joints and seams, joining and sealing flexible air duct seams and connections. May also be used for other industrial uses requiring a tape with these characteristics and benefits.

**340HT**  
Heat shield tape/aluminium foil welding tape, with a high shear, high heat resistant acrylic adhesive system, with silicone release paper. The dead soft foil conforms well to irregular surfaces. Available with and without finger lift edge. Designed to adhere to ceramic welding rod and to resist the high temperatures incurred during the welding process. Also used as a heat shield in automotive and other applications.

**311LT**  
A high strength aluminium foil tape with cold weather acrylic adhesive system, with silicone release paper. This adhesive combines high quick stick at low, normal and high temperatures along with excellent long-term performance at low temperatures and high humidity environments. Primarily used as a vapor sealing tape for fiberglass ductboard, sheet metal ducts and FSK systems.

**360-17**  
Foilmastic, butyl rubber aluminium tape, for indoor or outdoor sealing of low, medium and high pressure HVAC duct systems (includes: metal duct, fiberglass duct and flexible duct systems). Used for: sealing cracks & seams in gutters, roof valleys, eaves, hips & ridges, around chimneys & vent stacks, leaks in vans, cars & trucks. Repair gouger,rips, tears in metal panels of trailers, shipping containers & metal buildings, mobile home repair.

**360-35**  
Aluminium waterproof and sealing tape for indoor or outdoor used for: sealing of low, medium and high pressure HVAC duct systems, cracks and seams in gutters, roof valleys, eaves, hips & ridges, around chimneys & vent stacks, leaks in vans, cars & trucks. Repair gouger, rips, tears in metal panels of trailers, shipping containers and metal buildings, mobile home repair.

**INSTALLATION TAPE**

**422**  
COLOUR: grey  
Size: 30, 50mm x 33m  
PVC adhesive installation tape, frost resistant.  
Application: joining and sealing of pipes and channels of metal and plastics, combining and fixing of typical insulation materials, particularly polyurethane foam PVC jacket.

ANTICOR Plast system is designed for protecting the underground for example: earthing, lighting protection system.

Anticor Plast system contains the following components:

ANTICOR Plast products included corrosion inhibitors and antioxidants compounds.

The system gives an excellent protection against corrosion, is easy to apply, constantly plastic can be used in low temperatures (temperature range -34°C to +30°C), has a good electrical properties. Doesn’t contain hazardous substances to the health and environment.

**COATINGS OF ALUMINIUM LAMINATE**

**1577CW**

**COLOUR:** silver smooth, silver embossed  
**SIZE:** 50, 100, 500mm x 50m

A five-ply laminate, made with 3 layers of aluminium foil (core & outer layers) and 2 layers of polyester film, coated with a special cold weather acrylic pressure sensitive adhesive system which combines superior quick stick at normal temperatures with superior low temperature performance below freezing. The construction of this specialty laminate makes it highly puncture and tear resistant as well as flame retardant. Water Vapor Permeability of zero perm. This tape is primarily used as a facing for insulation. It is also used as a low temperature vapour barrier joint closure system.

**1579CW**

**COLOUR:** silver, white  
**SIZE:** 500, 1000mm x 50m

A 13-ply laminate (6 layers of aluminium foil, 4 layers of polyester film around a scrim reinforced core) coated with a special cold weather acrylic pressure sensitive adhesive system which combines superior quick stick at normal temperatures with superior low temperature performance below freezing. The construction of this specialty laminate makes it highly puncture and tear resistant as well as flame retardant. This tape is primarily used as a facing for insulation. It is also used as a low temperature vapour barrier joint closure system.

**NEW**

**ANTICOR Plast 701-40 - tape for protection underground earthing system**

**Earthing system - power industry**

**Earthing system - telecommunication**
**PE typical cloth tape** used for: packaging, bundling, sealing, seaming, repairing, holding & waterproofing, plumbing and asbestos abatement applications.

**Size:** 48mm x 50m
**Colour:** silver

**PE professional cloth tape** used for: industrial, carpet, plumbing, HVAC, sealing, waterproofing, patching and asbestos abatement applications.

**Size:** 48mm x 50m • 25, 48mm x 25m • 19, 25, 48mm x 9m • 38mm x 5m
**Colour:** silver

**Vinyl coated cloth gaffer’s tape.** Used for: bookbinding, repairing, bundling or wrapping wire, metals or plastics. Protecting & anchoring electrical wiring, moisture & dust-proof sealing of equipment cases and/or film canisters. Designed for exterior weather & temperature applications.

**Size:** 48mm x 55m • 48mm x 27.5m
**Colour:** black

---

**PVC Masking Tape**

**Application:** protection of woodwork with plastering, painting, superior at isolating colours on the external plaster. Does not leave glue for 21 days with external application.

**Size:** 30, 38, 50mm x 25m
**Colour:** yellow, white

ANTICOR Seal & Seal HT (Sealing compounds)

The sealing systems for pipes and cables passes. Prevents against gas, moisture, standing water and groundwater penetrations.

Features:
- adheres to the wet and dry surfaces,
- water and gas impermeable,
- requires minimal surface preparation,
- easy to apply,
- fast application
- long-term performance does not become hard,
- non-toxic - applicator and environment friendly,
- wide service temperature range:
  Anticor Seal (-15°C ÷ 20°C),
  Anticor Seal HT (-15°C ÷ 90°C),
- Anticor Seal is designed for gun application: aluminum foil cartridges 600ml and 310ml tubes
- Anticor Seal HT is designed for gun application: aluminum foil cartridges 600ml
System ANTICOR Seal:
1. ANTICOR Seal 511 (flexible sealant)
2. ANTICOR Seal 505 (mortar).

MARKING & WARNING TAPES

251
Foil marking tape to routs of steel pipelines and electrical power cables.
Colour: red, blue, yellow.
Thickness: 0.08mm, 0.20mm, 0.30mm, 0.40mm, 0.50mm.
Width: 20cm, 30 cm, 40cm, 50cm.

252
Foil marking tape to routs of steel pipelines and electrical power cables with printing (e.g. GAS, WATERSUPPLY, SEWAGE, FIBER OPTIC CABLE).
Colour: yellow, blue, green, brown, orange.
Width: 20cm.

254
Foil marking tape to routs of steel pipelines and electrical power cables with printing and with stainless steel ply.
Colour: yellow, blue, green, brown, orange, red.
Width: 20cm.

255
Warning tape to mark dangerous places.
Colour: white & red stripes, yellow & black stripes.
Width: 8cm.

631
SIZE: 50, 100mm x 33m
Self-adhesive tape for to the denotation of low ceilings, thresholds, stairs, degrees.
Colour: zółto-czarne.
Width: 5cm, 10cm.

1. What is the Bristle Blasting Process?
Bristle Blasting is a new process that uses a specially designed rotary bristle tool for achieving both corrosion removal and an anchor profile.

2. How does the tool perform blasting operations?
The rotating bristles are DYNAMICALLY TUNED to the power tool, which results in impact and immediate retraction of bristle tips from the corroded surface (see high speed photography).

3. How is this process similar to the abrasive grit blasting process?
The bristle tips are designed to strike the corroded surface with kinetic energy that is equivalent to grit blast media, thereby generating a texture and visual cleanliness that mimics the grit blasting process.

**UNDERSTANDING 3 KEY FEATURES OF THE BRISTLE BLASTING PROCESS**

- surface preparation to Sa 2½
- roughness of the 100μm

**Construction of MBX® Bristle Blaster® Industrial Pneumatic**

1. Noise reduction.
2. Air cooling.
3. Special speed reduction for increased power.
4. Bristle Blaster® Belt (steel elements).
5. Accelerator bar.
6. Adaptor system.
7. Flexible intake.
8. Dust Exhaust system (included).
**MBX® Bristle Blaster®**

**“GREEN” SURFACE PREPARATION SYSTEMS**

**MBX® BRISTLE BLASTERS PERFORMANCE**

- **Corrosion, Mill Scale, and Coating Removal...**
  Restores surface to near white/white metal visual standard.

- **Improved Integrity of Treated Surfaces...**
  Generates compressive residual stress along treated surface for crack growth resistance, improved fatigue life, and improved corrosion resistance.

- **Surface Texture Anchor Profile...**
  Roughness capability from 40-120 microns also on weld seams.

- **Negligible Heat Generation...**
  Surfaces free of thermal damage/heat marking.

- **Eco-friendly...**
  “Green” surface treatment, does not use/produce hazardous materials.

- **Simple Economical...**
  Eliminates the need for complex and costly abrasive blast equipment.

**EQUIPMENT AND ACCESSORIES**
