

KALİTE SİSTEMİ QUALITY SYSTEM

CE YÖNETMELİĞİ / CE GUIDELINE

CE işareti "Conformite European" kelimelerinin kısaltmasıdır ve literatürdeki anlamı "Avrupa normlarına uygunluk" tur. CE işareti, bir ürün ya da ürün grubunun, Avrupa Birliği' nin sağlık, güvenlik, çevre ve tüketicinin korunması konusunda oluşturmuş olduğu "ürün direktifleri" olarak anılan temel gerekliliklere uygun olduğunu gösterir. CE işareti bir kalite markası değildir. CE işareti, herhangi bir yerden alınan bir marka olmayıp, imalatçı tarafından ürüne, ambalaja ve/veya ilgili dökümana yapıştırılır.

CE Mark is the abbreviation of "Conformity European" and in literature mainly means conformity to European Norms. Any product or any product group carrying a CE mark, complies with fundamental requirements of European Union like human health, safety, environment and consumer rights. CE is not a quality mark. The producer is obliged to put CE mark on the product, packing and/or related document if exporting to Europe.

IEC / IEC

IEC Uluslararası Elektroteknik Komisyonu elektrik ekipmanlarının uluslararası standardizasyonu için kurulmuş bir organizasyondur.

The International Electrotechnical Commission is the world organisation for international standardisation of electrical equipment.

Almanya / Germany

Türkiye / Turkey

Ukrayna / Ukraine

Rusya - Russia

CENELEC (Avrupa Elektroteknik Standardizasyon Komitesi)

*CENELEC
(Comité Européen de Normalisation Electrotechnique
European Electrotechnical Standardisation Comitee)*

CENELEC, Belçika, Danimarka, Almanya, Finlandiya, Fransa, Yunanistan, İrlanda, İtalya, Lüksemburg, Hollanda, Norveç, Avusturya, Portekiz, İsveç, İsviçre, İspanya, Çek Cumhuriyeti ve İngiltere' nin ulusal elektroteknik standartları komitelerinden oluşmuş uluslararası bir oluşumdur. CENELEC üyesi ülkeler Avrupa Standartlarının gerekliliklerine herhangi bir değişiklik yapmadan uymak durumundadırlar.

CENELEC is made up of the national electrotechnical standards committees of Belgium, Denmark, Germany, Finland, France, Greece, Ireland, Italy, Luxemburg, the Netherlands, Norway, Austria, Portugal, Sweden, Switzerland, Spain, the Czech Republic and the United Kingdom. CENELEC members are obliged to adopt European standards (EU) without change.

KALİTE SİSTEMİ

QUALITY SYSTEM

IECEE (CEE) SİSTEMİ

IECEE (CEE) SYSTEM

Önceleri adı CEE olarak geçen, daha sonra IECEE olarak değişen, elektrik ekipmanlarının güvenlik standartları için uyum testlerinin oluşturduğu sistemdir. Farklı imalatçıların IEC 60309-1 ve IEC 60309-2 standartlarına göre üretmiş oldukları CEE norm fiş ve prizler aynı anma akımında, aynı çalışma gerilimi aralığında, aynı kutup sayısında ve aynı frekansta birbirleriyle uyumlu olmak zorundadır. Farklı voltaj ve frekansta fiş ve prizlerin birbir-lerine takılmasını önlemek için diğerlerine göre daha kalın ve uzun olan topraklama kontağı için saat kadranı şeklinde 12 ayrı pozisyon belirlenmiştir. "h" harfi ile devam eden rakam topraklama kontağının saat kadranı üzerindeki pozisyonunu gösterir. Topraklama kontak pozisyonunun yönü prizlerin kontak ağzı bize dönük olduğu durumda saat kadranının yönünü göstermektedir. Aksi belirtilmediği sürece standart ürünlerde topraklama kontağı saat 6 yönündedir (6h).

Formerly CEE, now IECEE is a system for conformity testing for standards for safety of electrical equipment. Standard CEE plugs and sockets according to IEC 60309-1 and IEC 60309-2 are designed and manufactured in a way that with the same rated current, nominal voltage, number of poles and frequency of different producers are compatible. In order to prevent the insertion of plugs and sockets of different voltages and frequencies, 12 positions of the earthing contact are assigned to the polarizing slot of the skirt of a socket. The number with the following letter "h" indicates the position of the earth contact, comparing the frontside of the socket or connector with the face of a clock. Unless otherwise mentioned, position of earth contact for standard products is 6h.

ROHS DİREKTİFİ - 2002/95/EC

ROHS DIRECTIVE - 2002/95/EC

RohS direktifi, elektrikli ve elektronik ekipman atıkları direktifini tamamlayıcı nitelikte olan ve elektrikli ve elektronik ekipmanların kurşun, civa, kadmiyum, heksovalant krom, PBB ve PBDE maddeleri gibi tehlikeli madde içeriklerinin azaltılmasının teminen yayımlanmıştır.

(Restriction of the use of certain Hazardous Substances)
The RohS directive is a complimentary part of waste of electronic and electrical equipment directive - WEEE and bows the placing on the EU market of new electrical and electronic equipment containing more than agreed levels of lead, mercury, cadmium, polybrominated biphenyl (PBB) and polybrominated diphenyl ether (PBDE) flame retardants.

63A - 125A CEE NORM FİŞ & PRİZLER 63A - 125A CEE NORM PLUGS & SOCKETS

Mermer ocakları ve maden ocakları, limanlar ve tersaneler gibi ağır ortamda kullanılmak üzere geliştirilmiştir.
Developed for heavy operationg conditions such as marble quarries, mining, harbours and shipyard industries.

- CuBe2 alaşımı, 18µm gümüş (Ag) kaplamalı kontak yayı (prizlerde)
- Fiş kontaklarda nikel (Ni) kaplama
- Çoklu temas noktası
- Güvenli ve düşük kayıplı akım geçiş yüzeyi
- Düşük kontak direnci
- Yüksek akım taşıma kapasitesi
- Düşük takma - çıkarma kuvveti
- Maksimum akım seviyesinde en düşük sıcaklık artışı
- Kolay montaj
- Yüksek güvenilirlik
- Üst düzey akım taşıma performansı
- Uzun çalışma süresi
- Tüm CEE grubunda 960°C ±10°C'ye dayanımlı alev almaz kontak taşıma gövdesi
- Pilot kontaklı ve pilot kontaklı priz opsiyonları (pilot kontak fişlerde standarttır)

- CuBe2 alloy contacts with 18 µm silver (Ag) plating (for female contacts)
- Nickel (Ni) plating for male contacts
- Contact from several points
- Current flow through reliable and low loss surface
- Low contact resistance
- High current carrying capacity
- Low insertion and extraction force
- Lowest temperature increase in maximum current levels
- East assembly
- High reliability
- High level current carrying performance
- Long operation time
- Non - flammable plastic contact carrier withstanding 960°C +/- 10°C
- Optional pilot contact for sockets (pilot contact is standard for male parts)

Piyasada var olan, aynı ürün grubundaki bazı kontak yapılarında kablo bağlantı yüzeyi ile kontak gövdeleri ayrı olup lehim, perçin gibi yöntemlerle ek yapılmıştır.

Some of the contacts existing in the market which are in the same product group, have separate contact and wiring surfaces and they were joined by soldering or riveting.

GT Connectors'lerde fiş ve priz gövdeleri ile kablo bağlantı yüzeyi yekpare olup, akım tek parça gövde üzerinde taşınmaktadır.

Contact and wiring surfaces in GT CONNECTORS are in a single piece and current is carried through this solid structure.

63A - 125A CEE NORM FİŞ & PRİZLER

63A - 125A CEE NORM PLUGS & SOCKETS

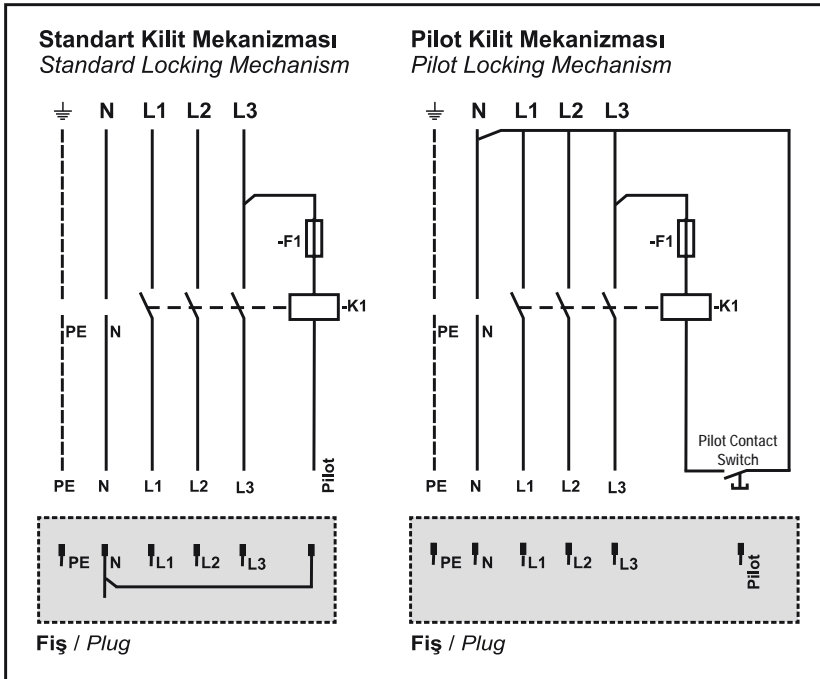

PİLOT KONTAK SİSTEMİ

PILOT CONTACT SYSTEM

Pilot kontak, 63A - 125A ürünlerde elektriksel kilitleme yapmak ve güvenliği sağlamak adına kullanılan yardımcı bir kontakdır. Fiş, prize takılırken en son temas eden kontak olduğu için tüm kontaklar iletim halindeyken devrenin bir gecikmeyle kapanmasını, fiş prizden ayrılırken de temastan ilk ayrılan kontak olduğu için devrenin önden açılmasını sağlar. Böylelikle fiş ve prizin yük altında takılmasına veya ayrılmasına engel olur. Pilot kantağı olan ürünlerde kontak boyları daha uzundur ve parmak temasına karşı koruma sağlayabilir. Bu koruma elektriksel kilitlemeyle sağlanır. Sistemin güvenli olarak çalışması için uygun akım değerinde kontak-tör kullanılmalıdır.

The pilot contact for levels of current from 63A to 125A is an auxiliary contact – with delayed close when inserted and leading open when pulled – and is used as an electrical interlock. An interlock prevents inserting and pulling under load. CEE couplings and socket outlets with pilot contact have longer phase contacts and do not guarantee safety from finger touch. This must be done by an interlock. In order to have safe operation of the system, a contactor with suitable current rating has to be used.
