

With Due Fili Plus, video door entry systems reach a long way

DUE FILI PLUS

EDVAX

We have upgraded performance, distances, scope for dialogue.

From today, with the new Due Fili Plus technology, video and audio door entry systems can be installed quickly, practically and with extreme flexibility in any kind of building.

Be it a single residential villa or a large office block, the Due Fili Plus system will connect up to 6400 internal units and 484 external units. Audio and video signals are received with maximum quality at distances of up to 1200 metres. Communication guaranteeing efficiency and higher performance.

ELVOX added value: professionalism giving you the best.

Elvox reaches out to the residential sector as well as to large structures: the constant research into technically advanced systems for every product we offer allows us to follow market trends and meet customer needs. It also guarantees easy operation, constant support and maximum efficiency.

Pre sales consultancy.

Elvox customer service begins long before the actual moment of purchase. The consultancy process starts with an analysis of the customer's needs, and a proposal as to the most suitable product. This is followed by estimates, pointers for installation, and prompt answers to any doubts concerning the practical side of the project.

After sales service.

The Elvox range stands out due to the technological excellence of its products, the security of a three-year warranty and the constant technical support on offer. We guide you every step of the way when choosing a solution to best suit your customers: our team of highly qualified personnel will give you all the assistance you need and provide professional support at every stage of your work cycle.

Simple installation.

Technologically advanced systems do not, in fact, always entail a complicated installation process. Elvox products actually satisfy all installation requirements while offering easy operation, to create high-performance solutions which suit everyone.

Efficiency.

All our products and systems are made up entirely of functional, high-performance components. This is what allows us to offer maximum operating efficiency, a guarantee of reliability and consistent safety in the long term.

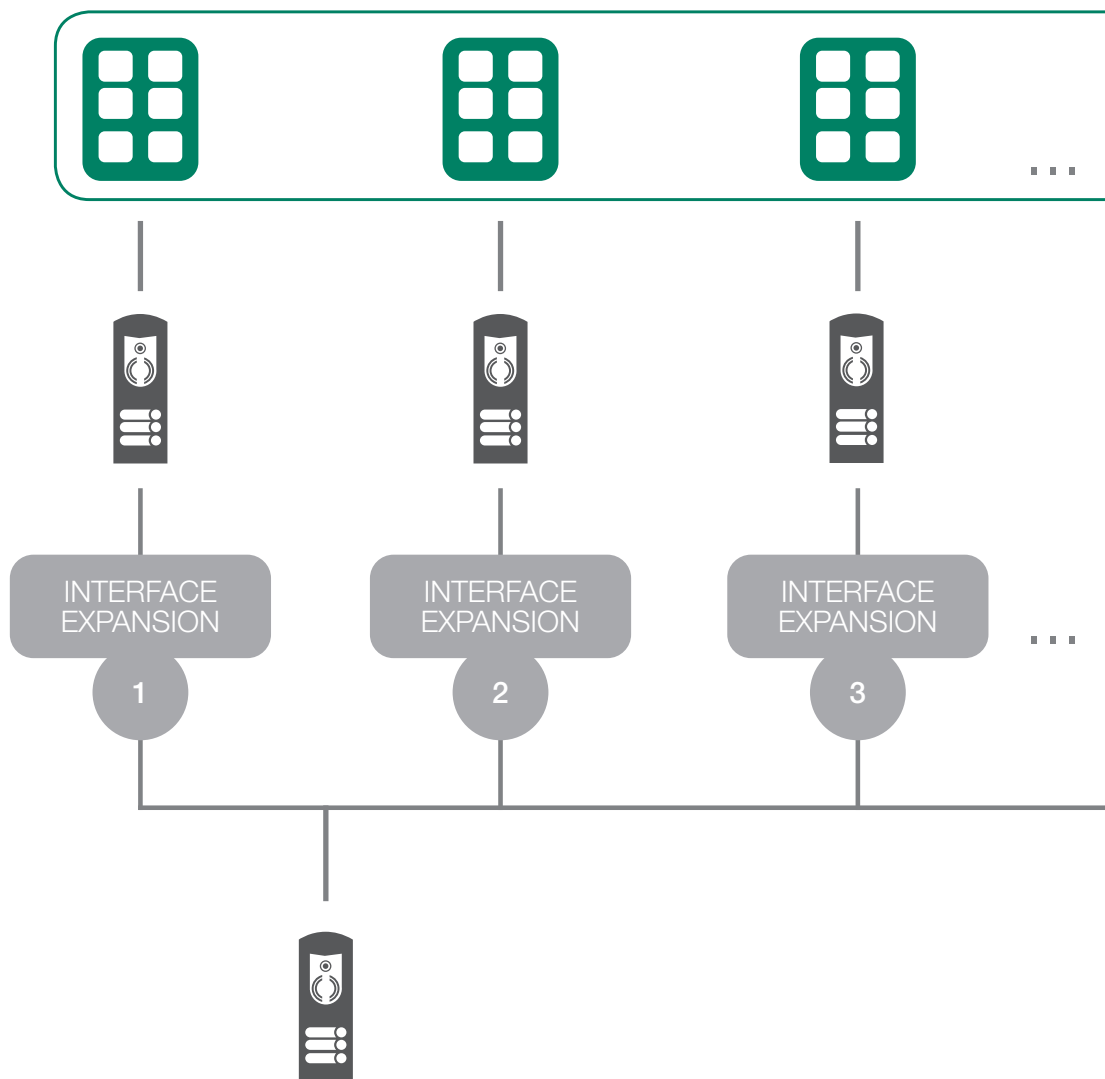

Range.

The new range highlights the constant search for innovation that has led to the development of technologically advanced solutions in line with the demand for increasingly high quality performance levels.

100% versatility: the Due Fili Plus system is suitable to small and large buildings with equal facility.

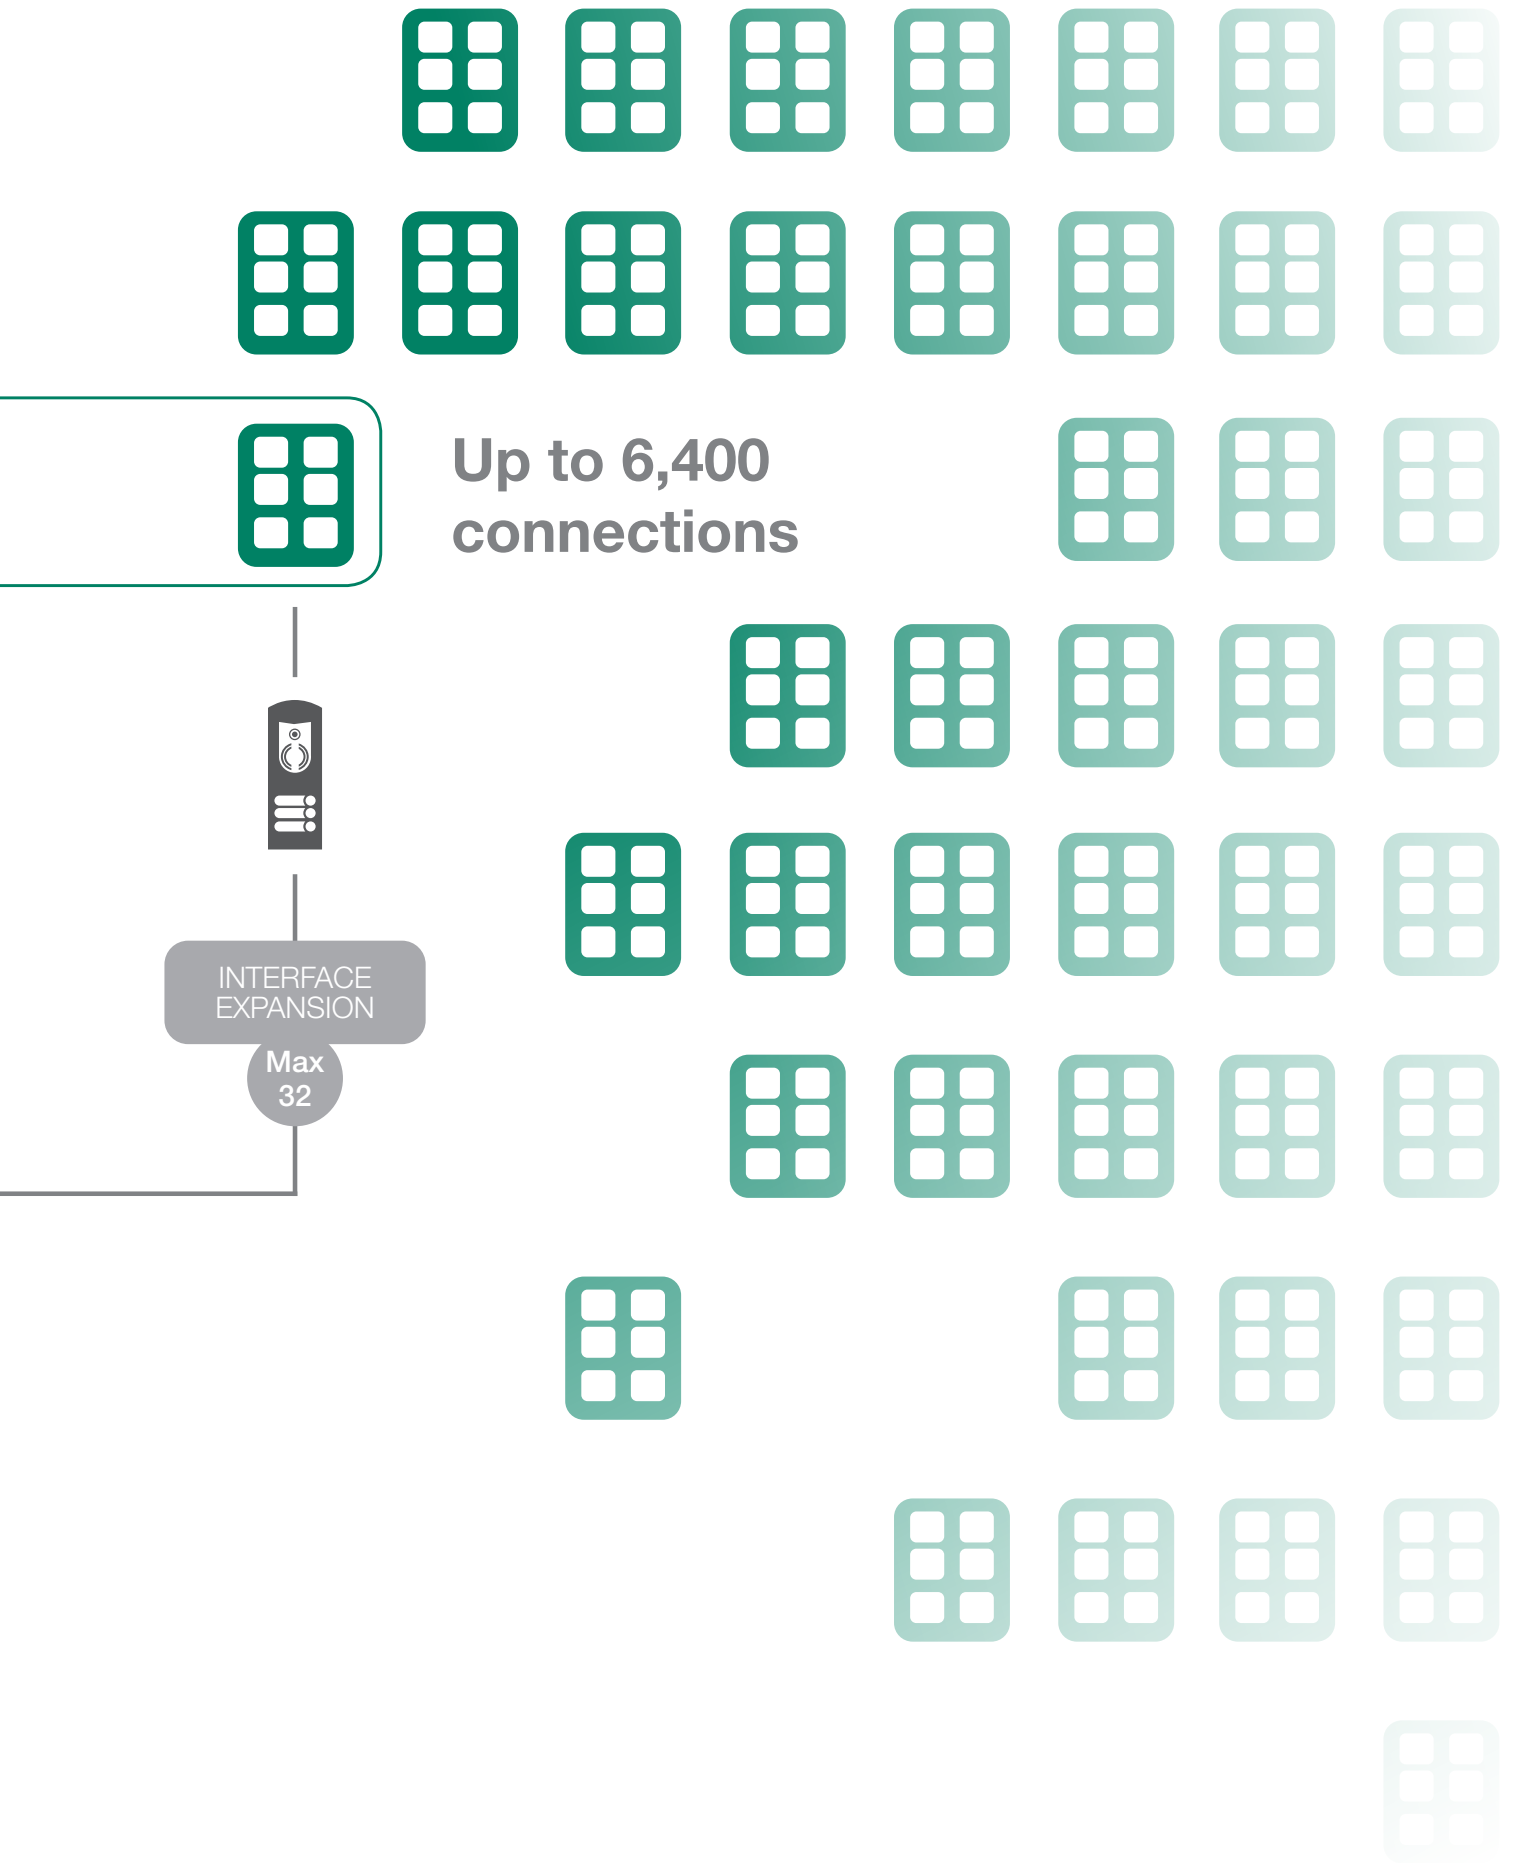

A technology offering speed, flexibility and precision, developed to facilitate the creation of video and audio door entry systems for every type of building with maximum simplicity. Single home or residential complex. Small office or large public building: Due Fili Plus guarantees faultless connections between all non-polarized devices through which power, audio/video and data signals are directed.

More units available.

Longer distance, greater number of units connected: Due Fili Plus will stand any comparison. The capabilities are impressive: systems with up to a maximum of 484 external units and up to 6400 internal units. Enhanced performance is delivered by the new expansion interface, with which the system can be enlarged by replicating several Due Fili Plus systems and creating up to 32 blocks.

Longer distances.

Compared to previous technologies, Due Fili Plus can be used to create solutions for systems even of considerable size. If the maximum distance formerly between an internal unit and an external unit was 300 metres, it can now be increased to 1200 metres, and with no loss in audio and video quality of the signal. This translates into a notable expansion of the practical possibilities offered in different structural situations.

Ready programming.

With the new Due Fili Plus technology, the programming of a video door entry system is simplified no end. The installer can take care of everything; programming of the external unit can be accomplished directly from the internal unit, with no outside assistance needed. The system is also able, once the internal unit has been coded, to simulate an audio/video call from the external entrance panel. By running this automatic check, the installer can be certain that the system has been correctly set up.

Expansion has been made easier.

Due Fili Plus technology minimizes the risk of errors being made during installation and simplifies wiring. In addition, any further expansion of the system is accomplished with the same ease thanks to the 69RS expansion interface, which can also be incorporated into existing installations. In effect, the new technology is downwardly compatible with the previous technology. The system can be used to connect as many as 6,400 internal units.

Compatibility is total.

Be it a TAB or 5700 series video door entry unit, the latest offerings from Elvox, or the 7200 series and the 4.3" Video touch screens of the By-me home automation system: Due Fili Plus technology is compatible with all the internal units listed in the Vimar Group catalogue. Your customers are assured the widest possible range of choice, whilst you yourselves benefit from a single system offering both extreme simplicity and superior performance at one and the same time.

Moreover, there is also total compatibility with existing installations. Each device can be added without difficulty to systems already in place, where the requirement is for replacement or addition of external or internal units.

The range that communicates best: video and audio door entry systems.

Offering a choice of classic or next-generation models, Elvox presents a wide and diversified range of internal devices that stand out for their high structural quality, for the care taken in design, and for their ease of application and use. Strictly Made in Italy.

Video door entry units.

The models proposed feature variations in terms of size, design, functionality, type of installation and monitor. These range from basic solutions comprising monitor and handset, through products with auxiliary services and functions such as automatic stair light switch, intercom calls to the very latest ultra slimline and modern units with hands-free speakerphone, 3.5" LCD screens or 7" touch screens.

8870

Audio door entry units.

Likewise in the case of audio products, door entry systems meet the same high standards of quality, whether of simple or more sophisticated design. Among the various functions offered are intercommunicability, hands-free operation, diversification of ringtones, door release or light switch, and telephone functions associated with the numerical keypad. And all available for every type of installation.

A warm welcome begins on the outside.

Elvox also offers a generous selection of styles for components of the system positioned on the outside of the building. Entrance panels vary in terms of size, design, structure, type of system and technology utilized, functions and installation.

Quick guide to the right system solution.

The first step when upgrading an existing system or installing a new system is to establish the type of system effectively required, so that the necessary components can be identified.

Audio systems. With single entrance panel.

With multiple entrance panels.

Basic system components:

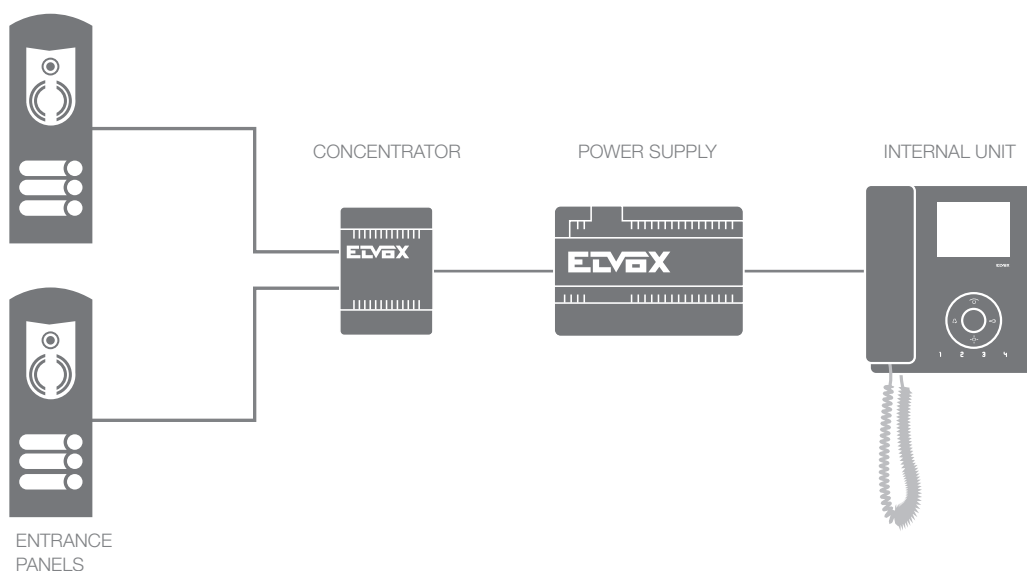

- Entrance panel (external unit + mechanical media).
- Power supply* and internal unit (audio).
- The connection of the various devices making up an "audio only" system can be made at any given point of the installation, wiring the external and internal units and other components of the system to the bus.

* this component handles both audio-only and audio+video systems

Mixed systems (audio+video). With single entrance panel.

With multiple entrance panels.

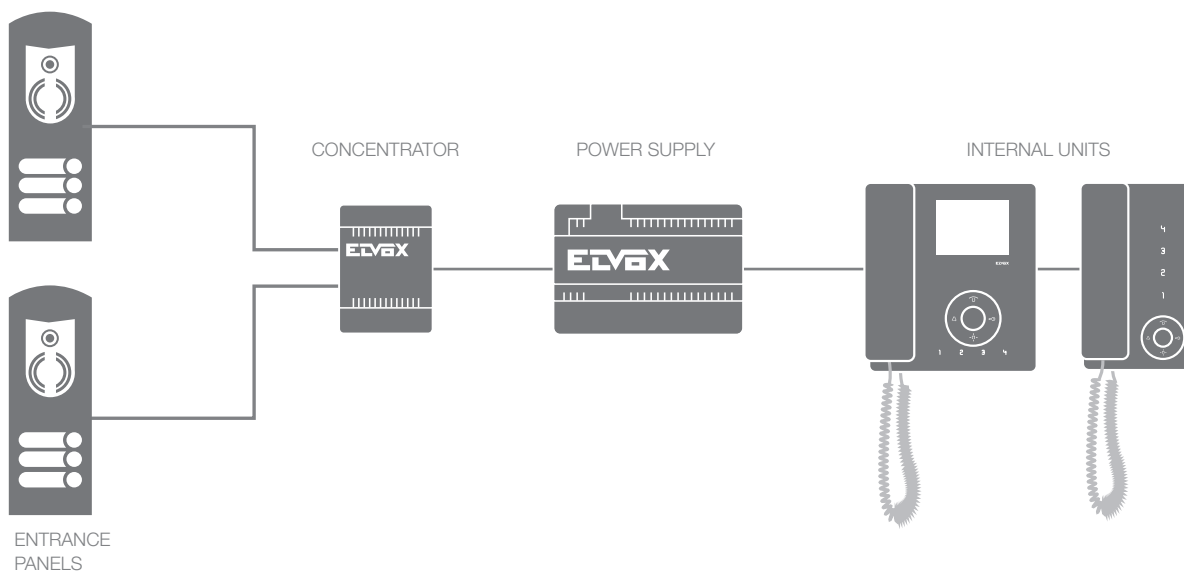

Basic system components:

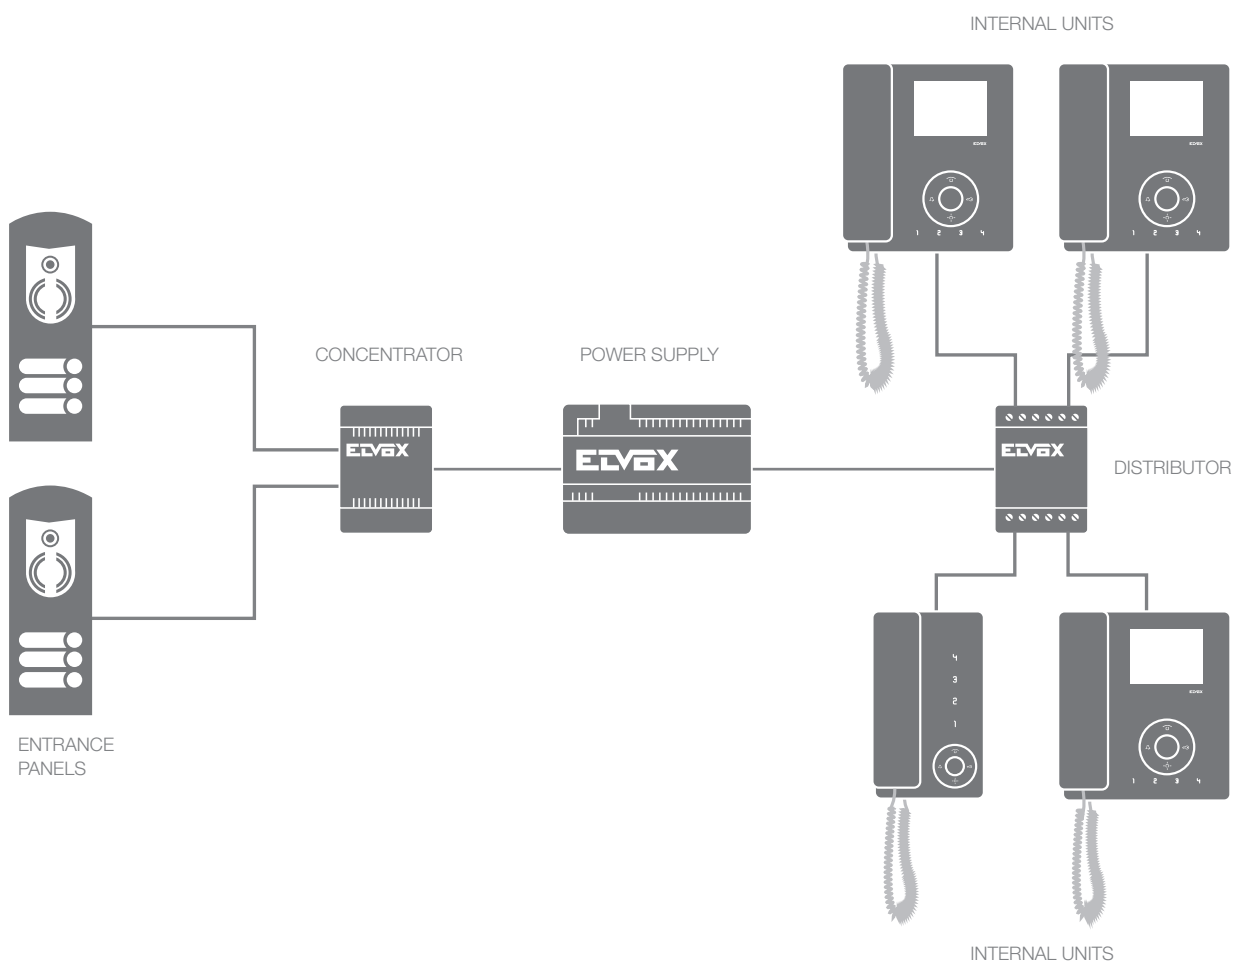

- Entrance panels (external units + mechanical media)
- Concentrator (combines multiple inputs)
- Power supply and internal units (audio + video).

In mixed systems (audio+video), for solutions with multiple audio and video entrance panels, the concentrator is required for installation of the external units.

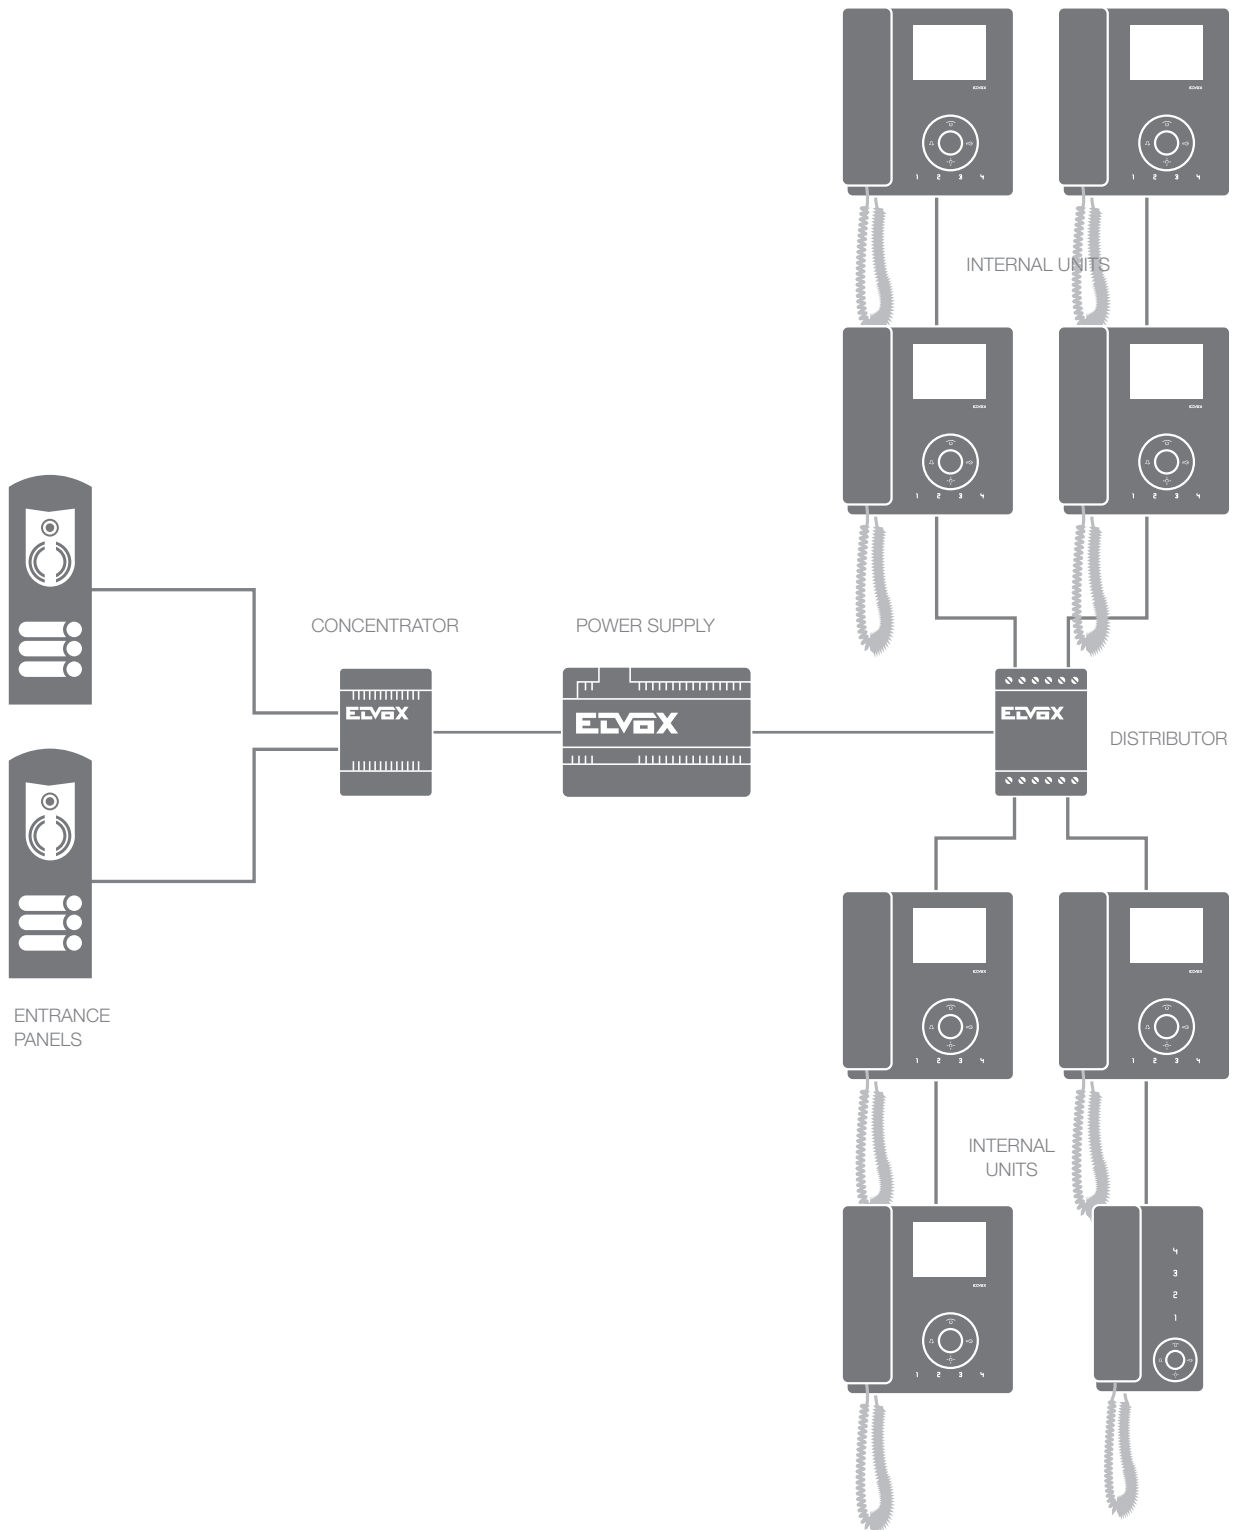

In the case of internal units, on the other hand, installations may use:
1 - linear wiring (enter-exit, no additional device needed).

2 - wiring with floor distributor, allowing 4 outputs to be taken off the riser.

3 - mixed wiring, where each of the outputs from the floor distributor can be used to connect a single internal unit, or multiple units in the same apartment for in-out system.

Selection of cable.

In the case of renovation projects, it is advisable to replace the more critical parts of the system — between entrance panels and power supply, and between power supply and distributors (riser) — with Elvox cable or CAT5 cable.

TYPE OF CABLE	ARTICLE	BURIABLE	AUDIO SYSTEMS	MIXED SYSTEMS
CABLE SECTION 1 mm ²	732I/100 732I/500	YES	RECOMMENDED	RECOMMENDED
CABLE SECTION 1 mm ²	732H/100 732H/500	NO	RECOMMENDED	RECOMMENDED
CAT5/6		NO	YES	YES

With different type of cable, the max distance to video distributor is 10 m.

When using CAT5/6 cable, the relative conductors must be paired as illustrated below.

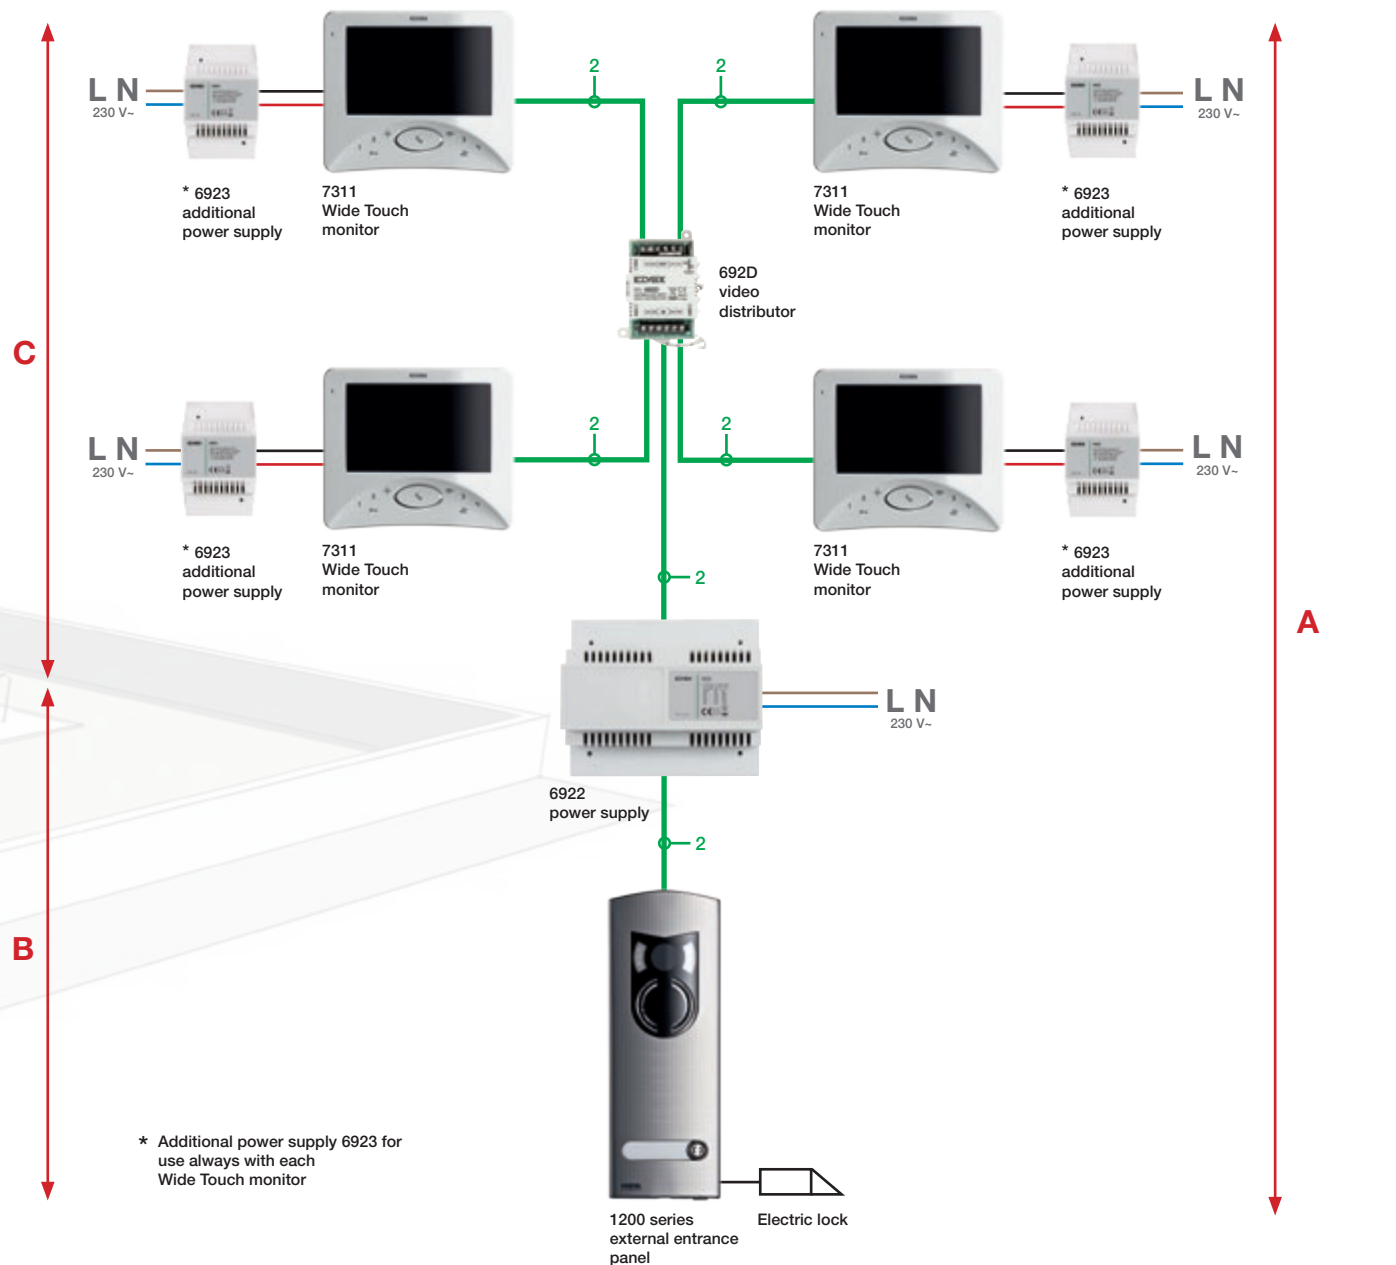

NOTE: where category 5 cable is indicated in the typical systems tables, data values are referred to the pairs of conductors as illustrated above.

Examples of typical systems.

Villa with video door entry system

Typical system: villa with video door entry system

- A - Max distance between the farrest external and internal unit
- B - Max distance between the entrance panel and the power supply
- C - Max distance between the power supply and the farrest internal unit

Type of cable	Max distance A	Max distance B	Max distance C	Max cable run
7321 or 732H	700 m	250 m	450 m	2000 m
Cat5 or Cat6	570 m	200 m	370 m	2000 m

Table relating to configuration with 1 external unit, 1 internal unit and power supply

Type of cable	Max distance A	Max distance B	Max distance C	Max cable run

Wide Touch - video door entry units

Wide Touch video door entry unit

Two-channel video door entry unit with touch screen, answering machine, hands-free and intercom call functions. Thermoplastic cover. Equipped with high resolution touch screen colour monitor, on-screen navigation menu and backlit soft-touch keys for video door entry functions. Functions managed from the soft-touch keys are: door lock release, self-start, auxiliary services (stair light), intercom calls, conversation, ringtone mute. Functions managed from the navigation menu are: video answering machine, automatic record, automatic answer, Family Memo, Picture Memo, directory, video cameras (dedicated and remote camera), activation of auxiliary services (including control by time slots), intercom calls, call to porter switchboard, date, time. With the Wide Touch monitor, the user can program the entire installation and save the configuration to a computer with the SaveProg software, by connecting directly to the monitor via the mini-USB port.

Conformity to standards

EMC Directive

Main specifications

- Power supply: Due Fili Plus two-wire Bus.
- Input for additional power supply (6923): touch screen controlled video door entry functions.
- 7" TFT LCD touch screen display, 16:9 widescreen aspect ratio.
- ABS thermoplastic cover.
- Backlit soft-touch keypad.
- Stylus pen for touch screen.
- Removable terminal block for connection to system.
- Electronic ringtone.
- Input for landing call with ringtone sound different from entrance panel and intercom ringtone.
- Output for additional ringtone 860A or relay 0170/101.
- Option of connecting a camera direct to the monitor.
- Option of flush wall mount, desk-top base (7311), or surface wall mount with standard fixing bracket (7321).
- Dimensions (7311): 204 x 174 x 18 mm + 40.5 mm.
- Dimensions (7321): 204 x 174 x 34 mm

Technical data

Inputs

power supply from Bus	28 Vdc rated voltage
absorption stand-by *	15 mA
max absorption operation	290 mA
operating temperature	0 °C to +40 °C

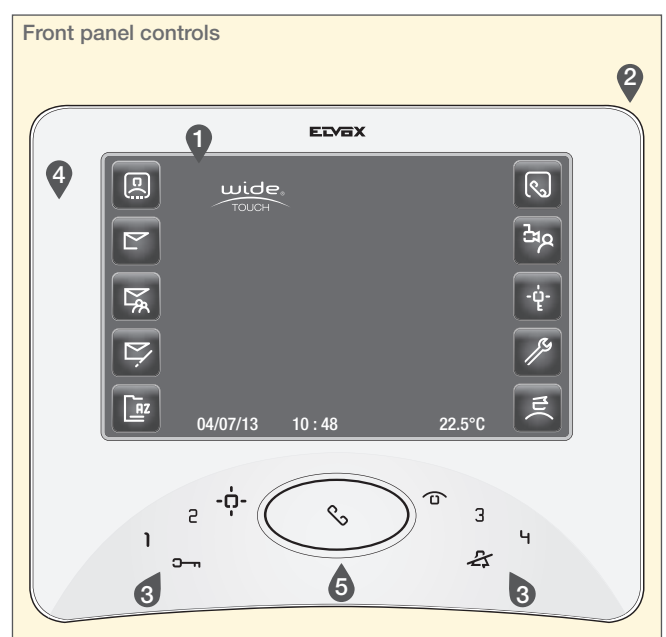

* without power supply 6923, otherwise consumption from Bus is 0. Additional power supply needed for activation of touch screen functions.

5700 series - video door entry units

5700 series video door entry unit

Two-channel hands-free video door entry unit with 3.5" LCD colour display and speaker for electronic call. Thermoplastic cover. Equipped with 8 soft touch buttons for: door lock release, self-start, auxiliary services (stair light), talk, internal voice line volume control, ringtone volume control and mute, selection of different ringtones, brightness control and configuration of terminal.

Conformity to standards

EMC Directive

Main specifications

- Power supply: Due Fili Plus two-wire Bus.
- Input for additional power supply (6923), allowing simultaneous start-up of more than two internal units.
- 3,5" LCD colour display.
- ABS thermoplastic cover.
- Keypad with 4 buttons assigned fixed functions and 4 buttons with variable functions, allowing access to internal menus: settings, configuration, auxiliary functions, brightness control, volume control, microphone Off, navigation.

- On-screen indication of monitor operating status (e.g. video call, audio call, intercom call, configuration, microphone Off, door open, ringtone mute, user away).
- Electronic ringtone.
- Input for landing call with ringtone sound different from entrance panel and intercom ringtone.
- Output for additional ringtone 860A or relay 0170/101.
- Flush wall mounting with 8 module Vimar V71318 back box.
- Dimensions: 151x142.5 mm + 39.9 mm.

Technical data

Inputs

power supply from Bus	28 Vdc rated voltage

Tab Free series - video door entry units

Tab Free video door entry unit

Hands-free video door entry unit made of thermoplastic material with 3.5" LCD colour display. Equipped with keypad for the main video door entry functions: speak/listen, door lock release, self-start, auxiliary services (stair light), ringtone muting and 4 programmable additional buttons that can enable up to 4 auxiliary functions or intercommunicating calls.

It is possible to control: brightness, ringtone volume and muting when "User Away" function is activated. Possibility of ringtone type selection for calls made from different points, e.g.: external entrance panel, landing call, intercom call.

LED signalling of "door/gate open" and "Unanswered calls" (up to 4 calls with video door entry unit in ringtone muted mode).

For use in Elvox Due Fili Plus systems with power supply 6922 or 6922.1.

The video door unit is provided of the functions for hearing aid wearers.

Conformity to standards

EMC Directive

Main specifications

- Due Fili Plus Bus power supply.
- 3.5" LCD display.
- Video door entry unit made of ABS with mirror gloss finish on front panel.
- Touch-sensitive keypad with backlit symbols (during operation).
- Electronic ringtone: with diversification between 10 different melodies signalling entrance panel calls, intercom calls and landing calls.
- Input for landing call.
- Designed for surface mounting with metallic baseplate or fitting in a box (can be mounted directly onto the wall using wall plugs or to a 3-module flush mounting box or Ø 60 mm round flush mounting box or 56x56 mm flush mounting box).
- Video door entry unit dimensions: 131x150x26,5 mm.

Technical data

Inputs	
power supply from Bus	28 Vdc rated voltage
absorption stand-by	10 mA
max absorption operation	160 mA
operating temperature	0° to +40° C

Adjustments and connections

A) Side adjustment of the volume.

B) Side adjustment of the brightness.

C) Terminal block for video door entry unit connection: to the Due Fili Plus system and to an external push-button for landing calls.

Touch-sensitive keypad and indicator light signalling

Speak/listen button.

Self-start push button.

Lock opening push button.

Auxiliary 1 (Stair light): for auxiliary service.

Ringtone mute push-button and signalling of:
 - (flashing light) incoming call from outdoor entrance panel or intercom device.
 - (steady light) ringtone muted.
 - (steady light that flashes every 10s, while the ringtone is muted) calls have been made from the entrance panel.

1 2 3 4

Programmable push-buttons for activating auxiliary services or intercom calls.

Brightness and volume control and connection terminal block

Touch-sensitive keypad and indicator light signalling

Tab series - video door entry units

Tab video door entry units

Video door entry unit made of thermoplastic material with handset and 3.5" LCD colour display. Equipped with four buttons for the main video door entry functions: door lock release, self-start, auxiliary services (stair light), ringtone muting and 4 programmable additional buttons that can enable up to 4 auxiliary functions or intercommunicating calls.

It is possible to control ringtone volume and muting when "User Away" function is activated. Option of ringtone type selection for calls made from different points, e.g.: external entrance panel, landing call, intercom call.

LED signalling of "door/gate open" and "Unanswered calls" (up to 4 calls with video door entry unit in ringtone muted mode).

For use in Elvox Due Fili Plus systems with power supply 6922 or 6922.1.

Products 7529/D and 7529/D04 are equipped with a function for hearing aid wearers.

Conformity to standards

EMC Directive

Controls and connections

- 1) Brightness control.
- 2) Contrast control.
- 3) Colour saturation control.
- 4) Terminal block for connection of video door entry unit: to the Due Fili Plus system, to an additional power supply if installed, to an additional external bell and to an external landing call button.

Soft-touch keypad and luminous indicators

	Self-start button.
	Ringtone mute button and indication of: - incoming call (from external entrance panel or intercom device) – blinking light. - ringtone muted – light permanently on. - calls made from entrance panel with ringtone muted – light permanently on and blinking every 10s.
	Lock release button. - light permanently on indicates door open.
	Auxiliary 1 (Stair light): assigned to auxiliary service.
	Programmable buttons for activating auxiliary services or intercom calls.

Main technical specifications

- Due Fili Plus Bus power supply.
- Input for additional power supply (6923), allowing simultaneous start-up of more than two internal units.
- 3.5" LCD display.
- Video door entry unit made of ABS with mirror gloss finish on front panel.
- Touch-sensitive keypad with backlit symbols (during operation).
- Electronic ringtone: with diversification between 10 different melodies signalling entrance panel calls, intercom calls and landing calls.
- Input for landing call.
- Output for additional ringtone 860A or relay 0170/101.
- Designed for surface mounting with metallic baseplate or fitting in a box (can be mounted directly onto the wall using wall plugs or to a 3-module flush mounting box or Ø 60 or 70 mm round flush mounting box).
- Video door entry unit dimensions with hooked handset: 160x180x45 mm.

Technical data

Inputs	
power supply from Bus	28 Vdc rated voltage
absorption stand-by	10 mA
max absorption operation	200 mA
operating temperature	0° to +40° C

Petrarca series - video and audio door entry units

Petrarca series monitors

Petrarca series monitor complete with connector for quick wiring to interphone 6209 or telephone 3562. Thermoplastic cover. Surface mounting or desk-top installation requires use of the relative fixing brackets or conversion kits.

Conformity to standards

EMC Directive

Technical specifications

- Power supply: Due Fili Plus two-wire Bus.
- 3.5" LCD B/W display (6029), 3.5" colour display (6209/C).
- ABS thermoplastic cover.
- Designed for use in combination with Petrarca door entry phone or telephone. Installation: surface mounting with metal back plate either directly to the wall or to a recessed back box (can be fixed with masonry plugs, or screwed to a 3-module rectangular back box), or as desk-top device, with special conversion kit.
- Dimensions surface mounting, monitor only: 135x226x45 mm.
- Dimensions surface mounting, monitor+interphone: 223x226x65 mm.
- Dimensions surface mounting, monitor+telephone: 223x226x65 mm.
- Dimensions on desk-top, monitor only: 135x80x200 mm.
- Dimensions on desk-top, monitor+interphone: 223x235x200 mm.
- Dimensions on desk-top, monitor+telephone: 223x235x200 mm.

Surface mounting interphones

Petrarca surface mounting interphone, speaker for electronic calls and screws for fixing to rectangular back box, or directly to wall with masonry plugs. Thermoplastic housing. Desk-top version requires use of the conversion kit. Equipped with 3 buttons, and designed to insert a further 6 buttons or accessories

Conformity to standards

EMC Directive

Technical specifications

- Power supply: Due Fili Plus two-wire Bus.
- Input for additional power supply (6923), allowing simultaneous start-up of more than two internal units in combination with monitor (video door entry system configuration).
- ABS thermoplastic housing.
- 3 buttons for audio/video door entry functions.
- Prewired to allow addition of six further buttons arranged in 3 pairs (692P, 692P/M, 692P/R), for intercom calls or auxiliary services.
- Electronic ringtone: with diversification among entrance panel calls, intercom calls and landing calls.
- Internal ringtone control, 2 levels of pitch.

Technical data (monitor+entry phone)

Inputs	
power supply from Bus	28 Vdc rated voltage
absorption stand-by	5 mA
max absorption operation	200 mA
operating temperature	0 °C to +40 °C

Controls

Controls

- | | | |
|----|--|---|
| 1) | | Contrast control for 6029 and colour control for 6029/C |
| 2) | | Brightness control |

- Prewired to allow the addition of module 6153/682, allowing control of ringtone volume at 3 levels of pitch, ringtone mute with luminous indicator, and door open luminous indicator.
- Input for landing call.
- Output for additional ringtone 860A or relay 0170/101.
- Designed for surface mounting with metal back plate, either fixed directly to the wall with masonry plugs or screwed to a recessed 3-module rectangular back box, or for use as a desk-top device, with special conversion kit.
- To be combined with Petrarca monitor 6029 or 6029/C using metal back plate for wall fixing or conversion kit for desk-top version.
- Dimensions of interphone with handset hung up: 89x226x65 mm.

Petrarca series - telephones

Surface mounting telephone

Petrarca series telephone for wall-mount or desk-top use. Equipped with 3 dedicated keys, for door lock release and auxiliary functions.

For use mainly with telephone switchboards 35P4, 35P8, 35P8/2F, 35P4/EG, 35P8/EG, 35P8/2EG in Due Fili Plus two-wire systems, and in conjunction with monitor 6029, 6029/C.

Conformity to standards

EMC Directive, R&TTE99/05 Directive

Main specifications

- Power supply from public telephone line.
- Compatible with Telecom Italia lines or PABX exchanges.
- ABS thermoplastic housing.
- Keyboard with 12 buttons (0, 1 ... 9 *, #), for selection of telephone numbers.
- RP key for repetition of last number dialled.
- R key (Flash), for activation of Telecom Italia auxiliary services.
- 3 dedicated buttons for audio/video door entry functions (lock release and 2 auxiliary services).
- Telephone configuration button.
- Programmable ringtone volume.
- Programmable ringtone tune.
- Designed for surface wall mounting, either fixed directly to the wall with masonry plugs or screwed to a recessed 3-module rectangular back box, or for use as a desk-top device, with base.
- To be combined with Petraca monitor 6029 or 6029/C using metal back plate for wall fixing or base for desk-top version.
- Dimensions of telephone with handset hung up: 89x226x65 mm.

■ **6153/682**

Giotto series - video door entry units

Giotto series video door entry units

Giotto 6300 surface mounting monitor with handset. Thermoplastic housing. Supplied with fixing bracket and terminal block, speaker for electronic calls and three buttons (door release, self-start and auxiliary functions). Desk-top installation requires use of the conversion kit.

Conformity to standards

EMC Directive

Technical specifications

- Power supply: Due Fili Plus two-wire Bus.
- Input for additional power supply (6923), allowing simultaneous start-up of more than two internal units.
- 3.5" TFT LCD B/W display (6329), 3.5" TFT LCD colour display (6329/C)
- ABS thermoplastic cover.
- 3 buttons for video door entry functions.
- Electronic ringtone: with diversification among entrance panel calls, intercom calls and landing calls.
- Input for landing call.

- Output for additional ringtone 860A or relay 0170/101.
- Designed for surface mounting with metal back plate either directly to the wall or to a recessed back box (can be fixed with masonry plugs, or screwed to a 3-module rectangular back box).
- Dimensions of video door entry unit with handset hung up: 204x220x71 mm.

Technical data

Inputs

power supply from Bus	28 Vdc rated voltage
absorption stand-by	10 mA
max absorption operation	200 mA
operating temperature	0 °C to +40 °C
additional power supply	with 6923

Option of using additional power supply 6923 where necessary (Bus voltage at monitor terminals 1 and 2 registering < 24 Vdc)

Front panel controls

1)		Lock release button.
2)		Auxiliary (e.g. stair light): assigned to 1° auxiliary service. Pressing and holding and simultaneously activates the 2° auxiliary service.
3)		Self-start button.
4)		Call ringtone muted indicator
5)		Door open indicator
6)		Contrast control for 6329 and colour control for 6329/C
7)		Brightness Control
8)		Volume control and ringtone mute
9)		Programming RESET button

6900 and 8870 series - interphones

6900 series surface mounting interphones

Surface mounting two-channel hands-free interphone. Audio door entry system with hands-free mode. Equipped with 4 buttons dedicated to the main audio and video door entry functions: door lock release, self-start, auxiliary services (stair light), talk. Other functions available include internal voice line volume control, ringtone volume control and mute, with activation of "privacy" function and selection of different ringtones. Facility of selecting different ringtones for calls made from different points, e.g.: external entrance panel, landing call, intercom call. With the ringtone muted, a red Led will indicate up to 4 unanswered calls by producing a sequence of blinks.

- Input for landing call with ringtone sound different from entrance panel and intercom ringtone.
- Luminous indicator – call ringtone muted.
- Luminous indicator – door open.
- Output for additional ringtone 860A or relay 0170/101.
- Designed for surface wall mounting, either fixed with masonry plugs or screwed to a 3-module rectangular back box or to round back boxes.
- Dimensions: 102x142x23 mm

Conformity to standards

EMC Directive

Main specifications

- Power supply: Due Fili Plus two-wire Bus.
- ABS thermoplastic housing.
- Keypad with 4 standard buttons + 6 additional buttons for auxiliary services and intercom calls.
- Electronic ringtone.

Technical data

Inputs	
power supply from Bus	28 Vdc rated voltage
absorption stand-by	10 mA
max absorption operation	110 mA (6901), 130 mA (6901/D)
operating temperature	0 °C to +40 °C

8870 series surface mounting interphones

Surface mounting interphone, equipped with two buttons and loudspeaker for electronic calls. Thermoplastic housing.

Conformity to standards

EMC Directive

Main specifications

- Power supply: Due Fili Plus two-wire Bus.
- ABS thermoplastic housing.
- 2 buttons, for lock release and one auxiliary function.
- Electronic ringtone.
- Input for landing call with ringtone sound different from entrance panel and intercom ringtone.
- Output for additional ringtone 860A or relay 0170/101.
- Designed for surface wall mounting, either fixed with masonry plugs or screwed to a 3-module rectangular back box.
- Dimensions: 75x220x60 mm

Technical data

Inputs	
power supply from Bus	28 Vdc rated voltage
absorption stand-by	10 mA
max absorption operation	65 mA
operating temperature	0 °C to +40 °C

Porter switchboard

Porter switchboards

Porter switchboard for apartment block systems. Controls calls coming from main entrance panels and from audio/video door entry units. Can be used to call internal units and connect them (intercom function). Equipped with alphanumeric display, electronic index and an internal clock for management of appointments and events. Auxiliary services and advanced programming of audio and video door entry units can be activated from the switchboard. With a telephone interface 69TF connected to the switchboard, calls can be diverted to a different number during night hours.

Conformity to standards

EMC Directive

Main specifications

- Dedicated power supply provided by 6923.
- Internal-External operating mode.
- ABS thermoplastic housing.
- Alphanumeric LCD display showing communication messages to and from the system.
- Handset for communications with entrance panels and audio/video internal units.
- Keypad for making calls, managing functions and configuring the switchboard (communication parameters, alphanumeric directory, clock and alarms).
- 2 metres of cable with socket and removable plug.
- Option of connecting an additional monitor (6029 or 6029/C), for calls from main entrance panels.
- Option of connecting and controlling 3 relays (0170/001) from the switchboard, for dedicated lock or auxiliary services.
- Operating temperature 0 to +40 °C.
- Desk-top installation.
- Dimensions: 310x120x235 mm

69TF - Telephone interface for porter switchboard

Interface allowing remotization of porter switchboard keypad and communications to a different number or cordless handset during night hours.

Conformity to standards

LV Directive, EMC Directive
Standards EN 60065, EN 61000-6-1, EN 61000-6-3

Main technical specifications

- Supply voltage 230 V 50 Hz 15V A.
- Telephone or cordless with tone dial (MF)
- ABS housing on DIN rail mountable enclosure, 8 x 17.5 mm module.
- Maximum overall dimensions 140x115x65 mm.

6923 - Additional power supply 28 Vdc 15 VA

The additional power supply is intended for use in conjunction with main power supply 6922 — in Due Fili Plus two-wire systems — to power electronic entrance panels, porter switchboard and video internal units.

The second power supply is required when several video entrance panels are fitted and/or when multiple video internal units are activated simultaneously by a single call; the power supply can serve a single specific device, entrance panel or video internal unit, or porter switchboard.

Conformity to standards

LV Directive, EMC Directive
Standards 2006/95/EC LV, 2004/108/EC

Main technical specifications

- Output voltage with PTC protection for auxiliary services.
- PTC protection in primary winding against short-circuits and thermal instability.
- Housing made of engineering polymer class V0 UL-94, DIN rail mountable enclosure, 4 x 17.5 mm module.
- Maximum overall dimensions 70x115x65 mm.

Technical data

Inputs		
operating voltage	230 Vac	
rated current	65.2 mA	
operating temperature	+5 °C to +35 °C	
operating frequency	50/60 Hz	
Outputs		
	- / +U	- / +I

6923	Additional power supply unit for Due Fili Plus system video door entry system with 28 Vdc output, supply voltage: 230 V~ 50 Hz 15 VA, installation on DIN rail (60715 TH35), occupies 4 modules size 17.5 mm

■ 69TF

6923

1200 series entrance panels

Electronic units

Audio and video electronic units combinable with 1200, 1300 and 8000 series to make up entrance panels. Supplied with a standard configuration, they can be customized to suit the particular system. The electronic unit can be programmed from the unit itself, or using programmer 950C, or alternatively, the PC software application SaveProg with interface 692I or 692I/U.

Conformity to standards

EMC Directive

13F4 and 13F7 - Main specifications

- Electronic unit with alphanumeric display.
- Alphanumeric keypad for making calls, exploring the electronic index, and configuring basic and advanced parameters of the electronic unit.
- Option to connect additional module 12TS (4 buttons in single row).
- Indication of "ENGAGED - PLEASE WAIT" message and operating steps on panel display.
- Electronic index with memory capacity for 1000 users (2 names of 16 characters each, per user).
- Audio external unit with sound balance control provided by trimmers and internal and external volume levels, via configuration menu.
- 13F7 with built-in colour camera with 1/4" sensor, minimum lighting 1.0 lux, user name backlit by white light Led, manual pan/tilt adjustment.
- 13F4 with inputs/outputs for connection and control of external camera, in configuration as video electronic unit.
- Power supply from Due Fili Plus Bus.
- Input for additional power supply (6923).
- Output for activation of electric lock (peak current $I_T > 1$ A for 10 mS followed by holding current $I_M = 200$ mA for as long as the lock control remains active).
- 2 outputs for activation of 2 relays 0170/001 operating auxiliary services.
- Input for door open sensor.
- Input for activation of lock by remote control.
- Removable terminal block for connection to system.

1200 series entrance panels

1200 series cover plates

Stainless steel audio/video cover plates with frame, for use in conjunction with electronic units, rainproof frames, flush or surface mounting back boxes, as components of entrance panels. Audio/video cover plates can be extended by fitting additional plates, with flush mounting back boxes and rainproof frames, or surface mounting back boxes. Cover plates, rainproof frames and back boxes are supplied in 2 different heights: 2-module and 3-module.

1200 series panels are also available on stainless steel columns with base. Columns are supplied complete with structure for floor-standing installation, without electronic units. Offered in 2 different heights: 173 and 147 cm.

Conformity to standards

EMC Directive

Main specifications

- Cover plate made from 316 grade (4VA) 8/10 gauge stainless steel with textured finish.
- Degree IP44.
- Pressure diecast aluminium heads (allowing fitment of front to frame by means of a special screw).
- Buttons carried in transparent impact-resistant polycarbonate support.
- Stainless steel frame.
- Buttons moulded from transparent polycarbonate with protective stainless steel cap.
- Single version of cover plate used for audio or audio/video electronic unit.
- Dimensions of 2-module cover plate: 100x280x22 mm
- Dimensions of 3-module cover plate: 100x395x22 mm
- Dimensions of 173 cm column: 145x1715x85 mm
- Dimensions of 173 cm column with base: 195x1725x200 mm
- Dimensions of 147 cm column: 145x1461,5x85 mm
- Dimensions of 147 cm column with base: 195x1471,5x200 mm

Installations

- 1) Cover plate and frame.
- 2) Electronic unit.
- 3) Flush-mounting back box.
- 4) Rainproof frame.
- 5) Surface mounting back box with rainproof frame.

1300 series entrance panels

Electronic units

Audio and video electronic units combinable with 1200, 1300 and 8000 series to make up entrance panels. Supplied with a standard configuration, they can be customized to suit the particular system. The electronic unit can be programmed from the unit itself, or using programmer 950C, or alternatively, the PC software application SaveProg with interface 692I or 692I/U.

Conformity to standards

EMC Directive

13F4 and 13F7 - Main specifications

- Electronic unit with alphanumeric display.
- Alphanumeric keypad for making calls, exploring the electronic index, and configuring basic and advanced parameters of the electronic unit.
- Option to connect additional module 12TS (4 buttons in single row).
- Indication of "ENGAGED - PLEASE WAIT" message and operating steps on panel display.
- Electronic index with memory capacity for 1000 users (2 names of 16 characters each, per user).
- Audio external unit with sound balance control provided by trimmers and internal and external volume levels, via configuration menu.
- 13F7 with built-in colour camera with 1/4" sensor, minimum lighting 1.0 lux, user name backlit by white light Led, manual pan/tilt adjustment.
- 13F4 with inputs/outputs for connection and control of external camera, in configuration as video electronic unit.
- Power supply from Due Fili Plus Bus.
- Input for additional power supply (6923).
- Output for activation of electric lock (peak current $I_T > 1$ A for 10 mS followed by holding current $I_M = 200$ mA for as long as the lock control remains active).
- 2 outputs for activation of 2 relays 0170/001 operating auxiliary services.
- Input for door open sensor.
- Input for activation of lock by remote control.
- Removable terminal block for connection to system.

Technical data	13F4	13F7
Power supply from Bus	min. voltage 24 Vdc	min. voltage 24 Vdc
Sensor	-	1/4"
Absorption stand-by	120 mA	120 mA
Max absorption operation	320 mA	320 mA
Minimum lighting	-	1.0 lux
Operating temperature	-10 °C to +55 °C	-10 °C to +55 °C
Camera adjustment	-	manual
Additional power supply	with 6923	with 6923

Option of using additional power supply 6923 where necessary (Bus voltage at terminals 1 and 2 of electronic unit registering < 24 Vdc)

13F1, 13F2, 13F3 and 13F5 - Main specifications

- Electronic unit with 8 call buttons arranged in 2 rows (4+4) for 13F3 and 13F5.
- Facility of increasing the number of call buttons by installing additional module 12TS (4 buttons in single row) for 13F3 and 13F5.
- Luminous indication of "ENGAGED - PLEASE WAIT" message for 13F3 and 13F5.
- Audio external unit with sound balance, internal volume and external volume adjustments provided by trimmers.

- 13F2 and 13F5 with built-in colour camera with 1/4" (13F2) or 1/4" (13F5) sensor, minimum lighting 1.0 lux, user name backlit by white light Led, manual pan/tilt adjustment.
- 13F1 and 13F2 with inputs/outputs for connection and control of external camera, in configuration as video electronic unit.
- Basic parameters configurable with the buttons of the electronic unit; configuration of advanced parameters using programmer 950C or alternatively, the PC software application SaveProg.
- Power supply from Due Fili Plus Bus.
- Input for additional power supply (6923).
- Output for activation of electric lock (peak current $I_T > 1$ A for 10 mS followed by holding current $I_M = 200$ mA for as long as the lock control remains active).
- 2 outputs for activation of 2 relays 0170/001 operating auxiliary services for 13F3 and 13F5.
- Input for door open sensor.
- Input for activation of lock by remote control.
- Removable terminal block for connection to system.

1300 series entrance panels

Plate series 1300

Extruded aluminium audio/video cover plates with frame, for use in conjunction with electronic units, rainproof frames, flush or surface mounting back boxes, as components of entrance panels. Audio/video cover plates can be extended by fitting additional plates, with flush mounting back boxes and rainproof frames, or surface mounting back boxes. Cover plates, rainproof frames and back boxes are supplied in 2 different heights: 2-module and 3-module.

Audio/video cover plates are supplied with 1 button, and additional plates with 8 or 12 buttons; the number buttons can be varied using special accessories: button module R131 and blanking module R130.

Conformity to standards

EMC Directive

Main specifications

- Extruded aluminium cover plate, 18/10 gauge.
- Degree IP44.
- End sections made of impact and UV resistant engineering polymer.
- Buttons carried in transparent impact-resistant polycarbonate support.
- One-piece pressed sheet metal frame, 12/10 gauge, pre-painted white.
- Buttons moulded from transparent polycarbonate with protective stainless steel cap.
- Single version of cover plate used for audio or audio/video electronic unit.
- Dimensions of 2-module cover plate: 100x277x22 mm
- Dimensions of 3-module cover plate: 100x391x22 mm

Installations

- 1) Cover plate and frame.
- 2) Electronic unit.
- 3) Flush mounting back box.
- 4) Rainproof frame.
- 5) Surface mounting back box with rainproof frame.

Operating temperature	-10 °C to +55 °C	-10 °C to +55 °C
Camera adjustment	-	manual
Additional power supply	with 6923	with 6923

Option of using additional power supply 6923 where necessary (Bus voltage at terminals 1 and 2 of electronic unit registering < 24 Vdc)

13F3 and 13F5 - Main specifications

- Electronic unit with 8 call buttons arranged in 2 rows (4+4).
- Facility of increasing the number of call buttons by installing additional module 12TS (4 buttons in single row).
- Luminous indication of "ENGAGED - PLEASE WAIT" message.
- Audio external unit with sound balance, internal volume and external volume adjustments provided by trimmers.
- 13F5 with built-in colour camera with 1/4" sensor, minimum lighting 1.0 lux, user name backlit by white light Led, manual pan/tilt adjustment.
- 13F3 with inputs/outputs for connection and control of external camera, in configuration as video electronic unit.
- Basic parameters configurable with the 8 buttons of the electronic unit; configuration of advanced parameters using programmer 950C or alternatively, the PC software application SaveProg.
- Power supply from Due Fili Plus Bus.
- Input for additional power supply (6923).
- Output for activation of electric lock (peak current $I_T > 1$ A for 10 mS followed by holding current $I_M = 200$ mA for as long as the lock control remains active).
- 2 outputs for activation of 2 relays 0170/001 operating auxiliary services.
- Input for door open sensor.
- Input for activation of lock by remote control.
- Removable terminal block for connection to system.

8000 series entrance panels

8000 series

8000 series entrance panels consist of the following elements, in combination with electronic units: standard modules, additional modules, module frames, rainproof frames, flush wall mount back boxes, surface mount back boxes. Steps required to make up an 8000 series entrance panel: selection of electronic unit, selection of modules suitable for the unit, selection of one or more frames for assembly of the modules, and selection of the appropriate back box — surface wall mount or flush wall mount — depending on the type of installation. When using a surface mounted back box, the rainproof frame is also required; the rain guard is not necessary for flush-mounted panels, but recommended nonetheless.

Conformity to standards

EMC Directive

Main specifications

- Modules and frames made of extruded and painted aluminium.
- Buttons moulded from transparent engineering polymer with protective stainless steel cap.
- Module for video units, with scratch-resistant and non-reflective hemispherical lens.
- Degree IP33.
- Dimensions of 2-module cover plate: 101x271 mm
- Dimensions of 3-module cover plate: 101x383 mm

Installations

- 1) Modules.
- 2) Module mounting frame.
- 3) Electronic unit.
- 4) Rainproof frame.
- 5) Flush mounting back box.
- 6) Surface mounting back box.

Patavium series entrance panels

Patavium series entrance panels

Entrance panels comprising cover plate, back box and electronic unit. Cover plates are made of gilt brass and protected by a PVD coating. Buttons and name-tags are backlit by Leds. Entrance panels can be expanded by installing additional panels alongside. Supplied with a standard configuration, they can be customized to suit the particular system. The electronic unit can be programmed from the unit itself, or using programmer 950C, or alternatively, the PC software application SaveProg with interface 692I or 692I/U.

Conformity to standards

EMC Directive

13T4 and 13T7 - Main specifications

- Electronic unit with alphanumeric display.
- Cover plate made of gilt brass and protected by a PVD coating.
- Flush-mounting sheet metal back box, galvanized.
- Alphanumeric keypad for making calls, exploring the electronic index, and configuring basic and advanced parameters of the electronic unit.
- Option to connect 8054/T additional entrance panel.
- Indication of "ENGAGED - PLEASE WAIT" message and operating steps on panel display.
- Electronic index with memory capacity for 1000 users (2 names of 16 characters each, per user).
- Audio external unit with sound balance control provided by trimmers and internal and external volume levels, via configuration menu.
- 13T7 with built-in colour camera with 1/4" sensor, minimum lighting 1.0 lux, user name backlit by white light Led, manual pan/tilt adjustment.
- 13T4 with inputs/outputs for connection and control of external camera, in configuration as video electronic unit.
- Power supply from Due Fili Plus Bus.
- Input for additional power supply (6923).
- Output for activation of electric lock (peak current $I_T > 1$ A for 10 mS followed by holding current $I_M = 200$ mA for as long as the lock control remains active).
- 2 outputs for activation of 2 relays 0170/001 operating auxiliary services.
- Input for door open sensor.
- Input for activation of lock by remote control.
- Removable terminal block for connection to system.
- Cover plate dimensions: 120x309x4 mm
- Back box dimensions: 105x266x55 mm

Letterboxes

Electronic units

Electronic unit for letterbox, allowing connection of up to 8 call buttons. The electronic unit is designed for application to 25Vx letterbox panels together with speech unit 2930 or camera + speech unit 2559. The number of call buttons can be augmented by incorporating addition panels and modules 693P and 693P/M. Supplied with a standard configuration, the unit can be customized to suit the particular system. The electronic unit can be programmed with programmer 950C, or alternatively, using the PC software application SaveProg with interface 692I or 692I/U.

Conformity to standards

EMC Directive

Main specifications

- Electronic unit with wiring for connection of up to 8 buttons.
- Facility of augmenting the number of call buttons with addition panels and modules 693P and 693P/M.
- Sound balance and internal and external volume levels adjustable by way of trimmers, for speech unit.
- Inputs/outputs for connection and control of external camera, in configuration as video electronic unit.

- Configuration of parameters with programmer 950C or using PC software application SaveProg 69CD.
- Power supply from Due Fili Plus Bus.
- Input for additional power supply (6923).
- Output for activation of electric lock (peak current $I_T > 1$ A for 10 mS followed by holding current $I_M = 200$ mA for as long as the lock control remains active).
- 2 outputs for activation of 2 relays 0170/001 operating auxiliary services.
- Input for door open sensor.
- Input for activation of lock by remote control.
- Removable terminal block for connection to system.

2930	Due Fili Plus audio electronic unit with loudspeaker/microphone for 25F3/8 electronic unit and 25Vx panels
■ 693P/M	Additional module for the connection of 8 call buttons, for use in conjunction with electronic unit 25F3/8, supplied with 2 x 50 cm harnesses and a terminal block for the connection of other 693P/M modules, for use in the wiring of different panels
693P	Expansion module for 8 buttons, for connecting a greater number of buttons to units 6931, 25F3/8 and 894M, supplied with 1 x 25 cm harness for the connection of other 693P modules, for use with cover plates 1200, 1300, 3300, 8000, Patavium, Letterbox, Post box

2930

■ 693P/M

Letterboxes

Letterboxes

The letterbox system comprises a range of modular elements made of extruded and painted aluminium, which can be assembled to create communal mailbox structures. Letterboxes can be stacked horizontally and/or vertically and allow different types of installation: indoors, flush wall mounted with access front and rear, or surface wall mounting with front access only, and outdoors, free-standing on legs anchored to the floor.

Letterboxes can be connected to an audio or video door entry system, installing an audio/video electronic unit, so as to make up an entrance panel with buttons.

Conformity to standards

EMC Directive

Main specifications

- Letterbox panels are supplied with: impact and UV resistant copolymer surround; extruded aluminium front door, 4 mm gauge.
- Degree IPX4.
- Anti-theft protection.
- Front opening with 2 copyable keys.
- Brass lock mechanism with chrome inserts.
- Sheet metal back box, 0.8 mm gauge, galvanized.

Installations

- Flush wall mount: panels (letter slot, with buttons) + back box 256S
- Surface wall mount: panels (letter slot, with buttons) + back box
- Floor-standing with pedestal: panels (letter slot, with buttons) + wall mount box 25A3 + pedestal 256P
- Floor-standing with legs: panels (letter slot, with buttons) + wall mount box 25A3 + legs 256G

Telephone switchboards

Telephone switchboards

Telephone switchboards with thermoplastic housing, 12-module DIN enclosure, containing power supply, pcb cards for outside lines (35PU) and pcb cards for internal extensions (35PI). Switchboards can be programmed via computer or using any one of the 8 (4) telephones connected. The following components can be connected to switchboards: 16 input/output modules (35PS) for auxiliary commands, one external audio output and input, one dedicated multifunction telephone and one expansion module (35PE).

Switchboards incorporate new functions such as: Bridge, Seguimi, Disa, Fax-Switch, group call, call sequence, 3 work services with time slots, an alarm service and, when used in combination with the appropriate interface (35PF), multiple audio door entry functions.

Conformity to standards

LV Directive, EMC Directive, R&TTE99/05 Directive
Standards EN 60065, EN 61000-6-1, EN 61000-6-3

Main specifications

- 1 outside line for 35P4 and 2 outside lines for 35P8/2F.
- Facility of connecting up to 4 telephones for 35P4 and up to a 8 telephones for 35P8/2F.
- Due Fili Plus system interface integrated for 35P8/2F.
- Facility of equipping 35P4 with one outside line using pcb card 35PU, 4 telephones using pcb card 35PI and Due Fili Plus two-wire interface using pcb card 35PF.
- 2 relay outputs (max voltage 30 Vdc 1.5 A).
- Power supply 230 V 50 Hz, maximum operating current 65 mA, stand-by current 9 mA.
- PTC protection in primary winding against short-circuits and thermal instability.
- Housing made of engineering polymer class V0 UL-94, DIN rail mountable enclosure, 12 x 17.5 mm module.
- Maximum overall dimensions: 208x135x72 mm.

35PS - I/O module

Module with 4 outputs and 2 independent inputs for telephone switchboards.

Conformity to standards

EMC Directive

Main technical specifications

- 2 relay outputs (N.O. and N.C. contacts), maximum contact loading 250 Vac 6 A.
- 2 open collector outputs 12 Vdc max 150 mA.
- 2 inputs with voltage free contacts or minimal voltage 3 Vdc
- ABS housing on DIN rail mountable enclosure, 4 x 17.5 mm module.
- Maximum overall dimensions: 70x115x50 mm.

Telephone switchboards

Telephone switchboard - DIN rail mounting devices (60715 TH35)

35P4	Telephone switchboard with 1 outside line, 4 internal lines, installation on DIN rail (60715 TH35), occupies 12 modules size 17.5 mm
35P8/2F	Telephone switchboard with 2 outside lines, 8 internal lines, interface for Due Fili Plus interphone systems, installation on DIN rail (60715 TH35), occupies 12 modules size 17.5 mm

35P4
35P8/2F

Accessories for telephone switchboards

35PU	Card for 1 outside line. Increases outside lines to two in switchboard 35P4
35PI	Card for 4 internal lines. Adds another 4 lines to switchboard 35P4, expanding it to the maximum total of 8 internal lines.
35PF	Interface card for Due Fili Plus interphone systems, for switchboards 35P4 and 35P8
35PS	Input/output module for connection to the telephone switchboard, with 2 general inputs, 2 live Open-Collector outputs and 2 x 6 A 250 V~ change-over relay outputs, installation on DIN rail (60715 TH35), occupies 4 modules size 17.5 mm

35PI

35PF

35PS

Power supplies

6922 and 6922.1 - Power supply 30 Vdc

Main power supply for Due Fili Plus audio and video door entry systems. The power unit supplies simultaneously entrance panels, interphones, video door entry units and other devices when power limits exceeded, it is necessary to improve the system with 6923 supply unit for every devices added.

Conformity to standards

LV Directive, EMC Directive
Standards CEI 64-8 art 411.1.2.2, 2004/108/EC (6922)
Standards EN 50486 (6922.1)

Main technical specifications

- Electronic protection inside primary winding, not resettable.
- The power supply has two types of protection signalled by 2 LEDs, one green and one red.
- Housing in class UL-94 V0 technopolymer on 8-module DIN rail measuring 17.5 mm.
- Maximum overall dimensions: 140x115x65 mm.

Technical data	6922	6922.1
Inputs		
operating voltage	110 to 240 Vac 60 VA	110 to 240 Vac 60 W
rated current	260,9 mA	max 1 A (110 V), 0,6 A (240 V)
operating temperature	0 to +45° C	0 a +45° C
operating frequency	50/60 Hz	50/60 Hz
Outputs		
rated voltage	30 Vdc	30 Vdc
rated current	800+400 to 800+800 mA depending on input voltage *	1,6 A max (1 A in continuously + 0,6 intermittent 80 s for ON and 120 s for OFF)
available outputs	1,2 / B1,B2	1,2 / B1,B2

*with 230 Vac 800 mA in continuous mode + 800mA

6923 - Additional power supply 28 Vdc 15 VA

The additional supply is intended for use in conjunction with main supply 6922 or 6922.1 — in Due Fili Plus two-wire systems — to power electronic entrance panels, porter switchboard and video internal units.

The second power supply is required when several video entrance panels are fitted and/or when multiple video internal units are self-started simultaneously by a single call; the power supply can serve a single specific device, entrance panel or video internal unit, or porter switchboard.

Conformity to standards

LV Directive, EMC Directive
Standards 2006/95/EC LV, 2004/108/EC

Main technical specifications

- Output voltage with PTC protection for auxiliary services.
- PTC protection in primary winding against short-circuits and thermal instability.
- Housing made of engineering polymer class V0 UL-94, DIN rail mountable enclosure, 4 x 17.5 mm module.
- Maximum overall dimensions: 70x115x65 mm.

Technical data		
Inputs		
operating voltage	230 Vac	
rated current	65.2 mA	
operating temperature	+5 °C to +35 °C	
operating frequency	50/60 Hz	
Outputs		
	- / +U	- / +I
rated voltage	26 Vdc	26 Vdc
rated current	0.5 A	0.5 A

6582 - Additional power supply

The additional power supply is used in Due Fili Plus two-wire systems to drive the backlighting circuits of name tags or cards of electronic entrance panels, supporting main power supply 6922 or 6922.1.

The power supply is required when 12TS modules are more than 4 in number and will serve up to 26 modules, or when there are more than 8 cards showing 15 names (alphanumeric entrance panels), and will serve up to 60 cards.

Conformity to standards

LV Directive, EMC Directive
Standards 2002/96/CE, 2004/108/CE, 2006/95/CE, CEI 64-8

Main technical specifications

- Output voltage with PTC protection for auxiliary services.
- PTC protection in primary winding against short-circuits and thermal instability.

Power supplies

Power supplies - DIN rail mounting devices (60715 TH35)

6922	Power supply unit for Due Fili Plus video door entry system with 30 Vdc output, power supply 110-240 V~ 50/60 Hz 60 VA, installation on DIN rail (60715 TH35), occupies 8 modules size 17.5 mm
▲ 6922.1	Power supply unit for Due Fili Plus video door entry system with 28 Vdc output, power supply 110-240 V~ 50/60 Hz, installation on DIN rail (60715 TH35), occupies 8 modules size 17.5 mm

6922
▲ 6922.1

Additional power supplies - DIN rail mounting devices (60715 TH35)

6923	Additional power supply unit for Due Fili Plus system video door entry system with 28 Vdc output, power supply 230 V~ 50 Hz 15 VA, installation on DIN rail (60715 TH35), occupies 4 modules size 17.5 mm
6582	Additional power supply unit for LEDs and CCTV type cameras, outputs 10.5 Vdc, 13.5 Vdc and 18 Vdc, power supply 230 V~ 50-60 Hz 35 VA, installation on DIN rail (60715 TH35), occupies 4 modules size 17.5 mm

6923
6582

Devices

6982 - Additional power supply 13.5 Vdc 10 VA

Additional power supply used for external CCTV camera connected to audio entrance panel (configured as video entrance panel). Activation of the power supply is piloted by the entrance panel.

Conformity to standards

LV Directive, EMC Directive
Standards 2002/96/CE, 2004/108/CE, 2006/95/CE, CEI 64-8

Main technical specifications

- Output voltage with PTC protection for auxiliary services.
- PTC protection in primary winding against short-circuits and thermal instability.
- Housing made of engineering polymer class V0 UL-94, DIN rail mountable enclosure, 4 x 17.5 mm module.
- Maximum overall dimensions: 75x115x65 mm.

69DM - Due Fili interface + Digibus

Audio and video Interface used for connection of Digibus backbone to a Due Fili Plus two-wire riser. Allows the connection of multiple Due Fili Plus systems comprising entrance panels, audio and video door entry units, to a Digibus backbone comprising entrance panels and/or porter switchboard. Each Due Fili Plus system requires an interface for connection to the Digibus backbone. Installation of the interface combines the advantages provided by the wiring used for audio and video door entry units of the Due Fili Plus system, with the capability of the Digibus backbone to cover long distances, for the connection of entrance panels.

Conformity to standards

EMC Directive
Standards 61000-6-1, EN 61000-6-3

Main technical specifications

- ABS housing on DIN rail mountable enclosure, 8 x 17.5 mm module.
- Maximum overall dimensions: 140x115x65 mm.

69RS - Expansion interface

With the expansion interface, the number of internal units (audio and/or video door entry phones, etc.) can be increased from 200 to 6400. In the Due Fili Plus two-wire system, the Bus is split up into a horizontal Bus and multiple vertical buses (32 max), with each vertical Bus connected to the horizontal Bus by way of a 69RS interface (one for each vertical Bus). Each vertical Bus (riser) allows the connection of up to:

- 200 internal units (audio and/or video door entry phones, telephone switchboards)
- 14 external units (electronic units, entrance panels and 69AM interfaces).
- 16 digital relays (8 x 69PH relay module).
- 1 x 945F switchboard.
- 1 level of 692S separators
- 6120 remote button modules.

Each horizontal Bus (backbone) allows the connection of up to:

- 32 x 69RS expansion interface.
- 36 external units (16 video electronic units/69AM selectors and 20 audio electronic units).
- 100 digital relays (50 x 69PH relay module).

Technical data

Inputs

Maximum absorption on backbone Bus	40 mW
Minimum absorption on riser Bus	25 mW
Maximum absorption on riser Bus	50 mW

Devices

Additional power supplies - DIN rail mounting devices (60715 TH35)

6982 Additional Due Fili Plus power supply unit for 12 Vdc external cameras and audio entrance panels 89F3 and 89F4, power supply 230 V~ 50 Hz, installation on DIN rail (60715 TH35), occupies 4 modules size 17.5 mm

6982

Due Fili Plus interface + Digibus - DIN rail mounting devices (60715 TH35)

69DM Interface for use in combining a Digibus backbone with a Two-Wire riser. If several 69DM interfaces are used, a number of Due Fili Plus risers can be connected to a single Digibus backbone. With a combination of the two systems, the Digibus backbone can cover considerable distances and the interphone/monitor riser can be connected using Due Fili Plus hardware, installation on DIN rail (60715 TH35), occupies 8 modules size 17.5 mm

69DM

Expansion interface - DIN rail mounting devices (60715 TH35)

69RS Expansion interface for the management of up to 200 internal units in Due Fili Plus systems. The use of several 69RS devices allows connection of up to 6400 internal units in the same system, installation on DIN rail (60715 TH35), occupies 4 modules size 17.5 mm

69RS

Devices

692S - Separator

The separator is an accessory used in Due Fili Plus two-wire systems to create distinct communication islands, and requires power supply 6922. Designed for use in the following situations:

- systems for building complexes where there are one or more main entrance panels, or single buildings with one or more secondary entrance panels inside. One separator for each building.
- systems where landing entrance panels are connected to the audio or video door entry unit. One separator for each landing entrance panel.
- systems with intercommunicating audio and video door entry units, which must not encroach on the communication channels used by other devices during a conversation.
- A maximum 16 separators can be installed in the system.
- Programming of the separator is accomplished using special configuration media (jumpers) supplied with the device.

Conformity to standards

EMC Directive
Standards 61000-6-1, EN 61000-6-3

Main technical specifications

- ABS housing on DIN rail mountable enclosure, 4 x 17.5 mm module.
- Maximum overall dimensions: 72x110x60 mm.

Technical data

Inputs	
power supply from primary Bus	28 Vdc rated voltage
minimum absorption from primary Bus	15 mA
maximum absorption from primary Bus	40 mA
power supply from secondary Bus	24 Vdc to 30 Vdc
minimum absorption from secondary Bus	25 mA
maximum absorption from primary Bus	50 mA
operating temperature	0 °C to +40 °C

69DV and 69DV/5 - Riser splitter

The splitter is used to divide the riser (with audio and video door entry units), creating up to 4 distinct risers.

Splitters can be connected in cascade — no more than 2 — so as to divide the riser into 8 sections.

Conformity to standards

EMC Directive
Standards 61000-6-1, EN 61000-6-3

Main technical specifications

- ABS housing on DIN rail mountable enclosure, 4 x 17.5 mm module.
- Maximum overall dimensions: 72x110x60 mm.

Technical data

Inputs	
power supply from Bus	28 Vdc rated voltage
operating temperature	0 °C to +40 °C

Devices

692D - Passive video distributor

The passive video distributor is a device allowing the simultaneous distribution of a video signal across multiple outputs separate from one another. It is used, for example, when a call signal needs to be transmitted to several video door entry units simultaneously (star connection).

Conformity to standards

EMC Directive
Standards EN 61000-6-1, EN 61000-6-3

Main technical specifications

- ABS housing on DIN rail mountable enclosure, 1 x 17.5 mm module.
- Maximum overall dimensions: 60x82x21 mm.

692D/2 - Active video distributor

The active video distributor is a device able to amplify an incoming signal and make it available across multiple outputs separate from one another; in practice it distributes the signal to a specific number of destinations simultaneously. It is used, for example, when a call signal needs to be transmitted to several video door entry units simultaneously (star connection).

Conformity to standards

EMC Directive
Standards EN 61000-6-1, EN 61000-6-3

Main technical specifications

- ABS housing on DIN rail mountable enclosure, 4 x 17.5 mm module.
- Maximum overall dimensions: 70x115x50 mm.

692M and 692M/5 - Amplifiers

This device is used in Due Fili Plus two-wire systems when the modulated video signal needs to be amplified. It provides two levels of amplification on the output side: +6 dB and +14 dB.

Conformity to standards

EMC Directive
Standards 61000-6-1, EN 61000-6-3

Main technical specifications

- ABS housing on DIN rail mountable enclosure, 1 x 17.5 mm module.
- Maximum overall dimensions: 60x82x21 mm.

692D/2

Amplifier - DIN rail mounting devices (60715 TH35)

■ 692M	Video signal riser amplifier, installation on DIN rail (60715 TH35), occupies 1 module size 17.5 mm
■ 692M/5	As above, but for systems using Cat. 5 cable

■ 692M
■ 692M/5

Devices

69MX and 69MX/5 - Concentrators

The concentrator is used to connect multiple external entrance panels (including one video entrance panel) in parallel. The concentrator has 4 inputs for 4 entrance panels, and 2 outputs for the riser; to increase the number of entrance panels in parallel, multiple concentrators can be connected in series or in cascade (up to a maximum of 16 entrance panels).

Maximum current between OUT 1 and OUT 2	1.5 A
Maximum current between OUT 1 and IN 1	0.8 A
Maximum current between OUT 1 and IN 2	0.8 A
Maximum current between OUT 1 and IN 3	0.8 A
Maximum current between OUT 1 and IN 4	0.8 A

69AM and 69AM/T - Selectors

Devices allowing the connection of 4 CCTV cameras to the Due Fili Plus two-wire system. The views from the four cameras are displayed cyclically, and selectable with the lock release button of the video door entry unit on completion of the self-start sequence. Expansion modules 69AM/4 (for 69AM) and 69AM/T4 (for 69AM/T) can be connected to the selectors, consequently increasing the number of cameras up to 16.

Conformity to standards

EMC Directive

Standards EN 61000-6-1, EN 61000-6-3

Main technical specifications

- 69AM selector for 4 CCTV cameras and/or 4 cameras with VIMAR microphone 20565/14565, 69AM/T selector for 4 CCTV cameras.
- Connection for expansion of cameras using selectors 69AM/4 and 69AM/T4.
- Output for control of camera power input.
- 2 outputs for activation of 2 relays 0170/001 operating auxiliary services.
- Input for additional power supply (6923).
- ABS housing on DIN rail mountable enclosure, 8 x 17.5 mm module.
- Maximum overall dimensions: 140x115x65 mm.

Technical data

Inputs	
power supply from Bus	28 Vdc rated voltage
absorption stand-by	20 mA
max absorption operation	120 mA
operating temperature	0 °C to +40 °C

69AM/4 and 69AM/T4 - Selectors

Expansions for selectors 69AM (69AM/4) and 69AM/T (69AM/T4). Up to 4 CCTV cameras can be connected for each expansion.

Conformity to standards

EMC Directive

Standards EN 61000-6-1, EN 61000-6-3

Main technical specifications

- 69AM/4 selector for 4 CCTV cameras and/or 4 cameras with VIMAR microphone 20565/14565, 69AM/T4 selector for 4 CCTV cameras.
- Up to 3 expansions can be connected to each selector 69AM and 69AM/T.
- ABS housing on DIN rail mountable enclosure, 4 x 17.5 mm module.
- Maximum overall dimensions: 70x115x50 mm.

Devices

Concentrator - DIN rail mounting devices (60715 TH35)

69MX	Concentrator for the connection of up to 4 entrance panels in parallel per module, at least one of which is a video entrance panel, installation on DIN rail (60715 TH35), occupies 4 modules size 17.5 mm
69MX/5	As above, but for systems using Cat. 5 cable

69MX
69MX/5

Selector - DIN rail mounting devices (60715 TH35)

69AM	Audio/video selector for 4 cameras. Enables connection of the video signal of 4 CCTV cameras and/or the audio/video signal of 4 VIMAR 20565/14565 cameras to the Due Fili Plus system. Camera selection is cyclical by way of the lock button after the auto-activation phase. The two auxiliary functions F1 and F2 can also be connected to the selector, installation on DIN rail (60715 TH35), occupies 8 modules size 17.5 mm
■ 69AM/4	Audio/video selector for 4 cameras, allows expansion of the number of cameras to be connected to the 69AM, to which up to 3 69AM/4 selectors can be connected to make a total of 8, 12, 16 cameras, installation on DIN rail (60715 TH35), occupies 4 modules size 17.5 mm
69AM/T	Video selector for 4 cameras. Enables connection to the Due Fili Plus system of only the video signal of 4 CCTV cameras. Camera selection is cyclical by way of the lock button after the auto-activation phase. The two auxiliary functions F1 and F2 can also be connected to the selector, installation on DIN rail (60715 TH35), occupies 8 modules size 17.5 mm
■ 69AM/T4	Video selector for 4 cameras, allows expansion of the number of cameras to be connected to the 69AM/T, to which up to 3 69AM/T4 selectors can be connected to make a total of 8, 12, 16 cameras, installation on DIN rail (60715 TH35), occupies 4 modules size 17.5 mm

■ **69AM/T4**

Devices

69MC and 69MD - Audio/video converters

Interfaces 69MC and 69MD are designed to extract audio and video signals from the Due Fili Plus two-wire Bus and convert them into standard signals. The 69MC interface extracts whenever a usable signal is detected in the Bus, whereas the 69MD extracts when a usable signal is detected and when a conversation between one or more programmed users is in progress. Interface 69MD can be programmed with programmer 950C, or alternatively, using the PC software application SaveProg with interface 692I or 692I/U.

Conformity to standards

EMC Directive

Standards EN 61000-6-1, EN 61000-6-3

Main technical specifications

- 1 video output rated 75 Ohm and 1 audio output.
- Signal extraction indicated by closing of relay contact (maximum contact loading 24 V 0.5 A).
- Input for additional power supply with 6582.
- ABS housing on DIN rail mountable enclosure, 4 x 17.5 mm module.
- Maximum overall dimensions: 70x115x50 mm.

692E - Protection

Designed to protect devices connected to the Due Fili Plus two-wire Bus (audio/video door entry phones, electronic units, etc.) from disturbances associated with surges above 40 V. It is advisable to install protections near entrance panels, on the riser, also on risers with long cable runs extending between power supply and audio/video door entry unit, especially when routed externally of the building where power supply 6922 (6922.1) is installed.

Conformity to standards

EMC Directive

Standards EN 61000-6-1, EN 61000-6-3

950C - Programmer

Programmer with display and alphanumeric keypad, used to configure the operating parameters of electronic units (entrance panels), audio and video door entry phones, and other devices requiring configuration. A specific connector is used to plug into the electronic unit or other device, from which the programmer also receives its power supply. The programmer can also be connected directly to the Due Fili Plus two-wire Bus and used to monitor data traffic on the Bus.

The programmer can function as an interface, by way of a serial connection, for configuration of the system using the PC software application SaveProg.

Devices

Audio/video converter - DIN rail mounting devices (60715 TH35)

69MC	Interface for converting a Due Fili Plus digital signal into a standard audio/video signal. Enables extraction of audio and video signal from the Due Fili Plus Bus when there is a usable signal. At the time of extraction, the interface indicates the operation by closing a N.O. contact (24 Vac 0.5 A) Requires dedicated power supply unit 6582, installation on DIN rail (60715 TH35), occupies 4 modules size 17.5 mm
69MD	Interface for converting a Due Fili Plus digital signal into a standard audio/video signal for the user, extraction only takes place when the users programmed in the interface are called, programming via 950C or PC, indication by closing a N.O. contact (24 Vac 0.5 A), for use with dedicated power supply unit 6582, installation on DIN rail (60715 TH35), occupies 4 modules size 17.5 mm

950C

Devices

692I and 692I/U - Interfaces

Interfaces for connection of a Personal Computer to Due Fili Plus two-wire systems by way of electronic units, or to other devices. The interface can be used, with a PC and software application SaveProg, to configure operating parameters and monitor elements of the system.

Conformity to standards

EMC Directive
Standards EN 61000-6-1, EN 61000-6-3

6120 - Remote buttons interface

Interface allowing the activation of auxiliary services using remote buttons, for connection to Due Fili Plus two-wire Bus. Auxiliary "lock release" and "landing call" functions can be programmed from the interface itself, whereas the activation of other actuator circuits (69PH and 69RH) or the auxiliary functions of electronic units must be configured using programmer 950C or the PC software application SaveProg.

Conformity to standards

EMC Directive
Standards EN 61000-6-1, EN 61000-6-3

Main technical specifications

- 2 independent inputs for 2 buttons with normally open contacts.
- Maximum overall dimensions: 48x70x19 mm.

69PH - Digital actuator, 2 outputs

A programmable device with two independent relays operating on the basis of separate or correlated programming. Programmable manually for standard functions, and using programmer 950C or SaveProg software for advanced functions. In standard operation, can be used as a monostable relay (default configuration) or as a call repeater (requires programming). The relays of module 69PH can be activated by audio/video door entry phone buttons or by a call from: external entrance panel, intercom audio/video door entry unit, porter switchboard or button interface 6120.

Conformity to standards

EMC Directive, LV Directive 2006/95/EC
Standards EN 61000-6-1, EN 61000-6-3, EN 60065

Main technical specifications

- Maximum load across contacts (terminals 1C/NO/NC, 2C/NO/NC): 230 V 6 A / AC1 (resistive or weak inductive load).
- Power supply from Due Fili Plus Bus.

Main technical specifications

- Serial cable DB9M-F for connection to PC, with 692I.
- USB cable for connection to PC, with 692I/U.
- Cables for connection to electronic units, porter switchboard and other devices.

Technical data

Inputs	
power supply from Bus	28 Vdc rated voltage
absorption stand-by	2 mA
max absorption operation	10 mA
operating temperature	0 °C to +40 °C
IP degree	20
Outputs	
available outputs	2

- Absorption: 1.8 mA in standby, 15 mA in operation, 80 mA for 80 ms peak current.
- Operating temperature: 0 - 40°C
- ABS housing on DIN rail mountable enclosure, 4 x 17.5 mm module.
- Maximum overall dimensions: 70x115x50 mm.

Technical data

Inputs	
operating voltage	28 Vdc rated voltage
absorption stand-by	1.8 mA
min absorption operation	15 mA
max absorption operation	80 mA
operating temperature	0 °C to +40 °C
IP degree	20
Outputs	
rated voltage	230 V
rated current	6 A
contact rating	6 A
available outputs	2

Devices

Interfaces

■ 692I	PC interface with RS232 connector and 69CD software for basic and advanced programming of Due Fili Plus devices, for apartments with more than 4 monitors or interphones in a single apartment
692I/U	As above, with USB connector
6120	Interface for 2 N.O. remote buttons along the Due Fili Plus Bus for activation of an entrance panel lock and door call function of an internal device, can be used to activate auxiliary functions through programming with 950C

6120

Relay - DIN rail mounting devices (60715 TH35)

69PH	Programmable device with 2 x 6 A 230 V~ change-over relays operating in line with separate or correlated programming, can be programmed manually for standard functions and using programmer 950C or SaveProg software for advanced functions, in standard operation it can be used as a monostable relay or call repeater, installation on DIN rail (60715 TH35), occupies 4 modules size 17.5 mm
------	--

69PH

Devices

69RH - Digital actuator, 2 outputs

Programmable device equipped with two relays. Configurable to allow 2 operating modes: actuator for auxiliary services or call repeater.

Actuator mode: the relays operate independently and can be activated by the buttons of audio or video door entry units.

Call repeater mode: the relays are activated by calls made to a single audio/video door entry unit or to a group of units (4 groups maximum). In this instance, one relay repeats entrance panel calls and one repeats intercom calls.

The actuator is configurable internally.

Conformity to standards

EMC Directive, LV Directive 2006/95/EC

Standards EN 61000-6-1, EN 61000-6-3, EN 60065

Main technical specifications

- Maximum loading of normally open contacts: 230 V 3 A.
- 2 trimmers for setting relay activation times.
- multiple 69RH actuators can be connected to the same system: maximum 8.
- ABS housing on DIN rail mountable enclosure, 4 x 17.5 mm module.
- Maximum overall dimensions: 70x115x50 mm.

Technical data

Inputs	
operating voltage	28 Vdc rated voltage
absorption stand-by	15 mA
max absorption operation	100 mA
operating temperature	0 °C to +40 °C
IP degree	20
Outputs	
rated voltage	230 V
rated current	3 A
contact rating	3 A
available outputs	2

69RH/L - Digital actuator activated by call from entrance panel, 2 outputs

A programmable device with two independent relays that are activated by calls made from an entrance panel. The actuator will also respond to entrance panel calls not associated with audio or video door entry phones. The actuator is configurable internally.

Conformity to standards

EMC Directive, LV Directive 2006/95/EC

Standards EN 61000-6-1, EN 61000-6-3, EN 60065

Main technical specifications

- Maximum loading of normally open contacts: 230 V 3 A.
- 2 trimmers for setting relay activation times.
- ABS housing on DIN rail mountable enclosure, 4 x 17.5 mm module.
- Maximum overall dimensions: 70x115x50 mm.

Technical data

Inputs	
operating voltage	28 Vdc rated voltage
absorption stand-by	15 mA
max absorption operation	100 mA
operating temperature	0 °C to +40 °C
IP degree	20
Outputs	
rated voltage	230 V
rated current	3 A
contact rating	3 A
available outputs	2

0170/101 - Relay

Relay with normally open and normally closed contact. Can be activated by low voltage signals and by electronic call signals (e.g. Sound System).

Conformity to standards

EMC Directive, LV Directive 2006/95/EC

Standards EN 61000-6-1, EN 61000-6-3, EN 60065

Main technical specifications

- Maximum loading of contacts: 230 V 3 A.
- Pilot voltage: 7-13 Vdc/ac, 14-20 Vdc/ac, electronic calls (e.g. Sound System)
- Blowout circuit for inductive loads connectable to contacts.
- ABS housing on DIN rail mountable enclosure, 4 x 17.5 mm module.
- Maximum overall dimensions: 70x115x50 mm.

Devices

Relay - DIN rail mounting devices (60715 TH35)

69RH	Programmable device with 2 N.O. relays 3 A 230 V~ for operation as a timed dual relay for the activation of 2 independent auxiliary services (e.g. stair light), up to 8 devices in the same system, installation on DIN rail (60715 TH35), occupies 4 modules size 17.5 mm
69RH/L	Programmable device with 2 timed relays with N.O. contacts 3 A 230 V~, controlled by calls from the entrance panel, installation on DIN rail (60715 TH35), occupies 4 modules size 17.5 mm
■ 0170/101	3 A 230 V~ change-over relay for call repetition on interphones and monitors with additional chimes (kettledrum), power supply 12 Vdc or Vac or Sound System call, installation on DIN rail (60715 TH35), occupies 4 modules size 17.5 mm

69RH
69RH/L
■ 0170/101

Ringtone and cables

860A - Electronic ringtone

Self-powered electronic chime with 2 control inputs and 2 different sounds (3 notes and 2 notes). Connectable to audio and video door entry phones for call repetition.

Conformity to standards

EMC Directive

Standards EN 61000-6-1, EN 61000-6-3

Main technical specifications

- Surface mounting door chime. ABS housing.
- Power supply: 230 V.
- 2 inputs for: 1 sound with 3 notes and 1 sound with 2 notes.
- Volume control trimmer.
- Designed for surface mounting direct to wall or to back box (can be fixed to masonry with plugs, or screwed to flush-mounted 3-module rectangular back box).
- Maximum overall dimensions: 140x140x50 mm.

Technical data

Inputs

operating voltage	230 V
rated current	15 mA
operating temperature	0 °C to +40 °C
IP degree	20

732H/100 and 732H/500 - Cables for indoor installation

Cable for connection of audio and video door entry units in Due Fili Plus two-wire systems. Suitable for fixed internal installation on masonry and metal structures, and laying along cable trays, raceways or conduit. NOT suitable for routing along underground raceway.

732I/100 and 732I/500 - Cables for outdoor installation

Cable for connection of audio and video door entry units in Due Fili Plus two-wire systems. Suitable for fixed internal installation on masonry and metal structures, and laying along cable trays, raceways or conduit, where indicated under statutory regulations on crowded premises. Suitable for laying underground in dry or easily drained conduit (damp conditions 24h max). NOT suitable for installation underground without conduit

Conformity to standards

CEI EN 50363-0, CEI EN 60228, CEI EN 60332-1-2

Industry standards CEI EN 50267-2-1, CEI EN 60332-3-25

Industry standards CEI EN 50267-2-1, CEI EN 60332-3-25, CEI UNEL 36011

Main technical specifications

- Cable Comprises PVC-RZ sheath and 2 twisted pair conductors of 1 mm² section
- 100 m coil (732H/100) and 500 m coil (732H/500).
- Outer diameter: 6.5 mm max.
- Operating temperature: -25 °C / +70 °C.
- Rated insulation voltage: 450/750 V.

Main technical specifications

- Comprises sheath and insulation made of non-toxic thermoplastic LSZH, and 2 twisted pair conductors of 1 mm² section.
- LSZH is used for systems installed in premises where statutory requirements include ultra-low smoke and fume and zero halogen emissions in the event of fire.
- 100 m coil (732I/100) and 500 m coil (732I/500).
- Outer diameter: 7.6 mm.
- Operating temperature: -25 °C / +70 °C.
- Rated insulation voltage: 600/1000 V.

Extended video kits

Extended video kits for flush mounting

Video door entry kits using just two non-polarized conductors (twisted pair) to connect video door entry phone/power supply, power supply/entrance panel, entrance panel/door lock. Recommended cable: 732H/100, 732H/500, 732I/100, 732I/500, supplied separately. Kits are expandable to allow the addition of further video door entry units and entrance panels. Power supply 230 V 50 Hz.

7211/KI1	7200 series colour video door entry kit. Comprises: - 1 x 1200 series stainless steel flush wall mount entrance panel with 1 call button (1221 + 9192); - 1 x button operated electronic unit with colour video camera and speech unit (13F5); - 1 x 7200 series flush-mounting monitor with 7" TFT LCD colour screen, 16:9 widescreen aspect ratio (7211 + 7249); - 1 x power supply (6922).
7211/KA	7200 series colour video door entry kit. Comprises: - 1 x 1300 series anodized and electro-polished aluminium flush wall mount entrance panel with 1 call button (1321 + 9192); - 1 x button operated electronic unit with colour video camera and speech unit (13F5); - 1 x 7200 series flush-mounting monitor with 7" TFT LCD colour screen, 16:9 widescreen aspect ratio (7211 + 7249); - 1 x power supply (6922)
5721/K	5700 series colour video door entry kit. Comprises: - 1 x 1300 series anodized and electro-polished aluminium flush wall mount entrance panel with 1 call button (1321 + 9192); - 1 x button operated electronic unit with colour video camera and speech unit (13F5); - 1 x 5700 series flush-mounting monitor with 3.5" LCD colour screen and back box (5721 + 6149); - 1 x power supply (6922).

Extended video kits

Extended video kits for surface mounting

Video door entry kits using just two non-polarized conductors (twisted pair) to connect video door entry phone/power supply, power supply/entrance panel, entrance panel/door lock. Recommended cable: 732H/100, 732H/500, 732I/100, 732I/500, supplied separately. Kits are expandable to allow the addition of further video door entry units and entrance panels. Power supply 230 V 50 Hz.

▲ 7529/M	TAB series colour video door entry kit . Comprises: - 1 x 1300 series anodized and electro-polished aluminium flush, with surface and flush mounting boxes, 1 external button (13K1); - 1 x button operated electronic unit with colour video camera and speech unit (13F2); - 1 x TAB series surface mounting monitor with 3.5" TFT LCD colour screen (7529); - 1 x power supply (6922).
* 7529/MD	As above, with video door entry unit prewired for hearing aid function
7529/K	TAB series colour video door entry kit . Comprises: - 1 x 1300 series anodized and electro-polished aluminium flush wall mount entrance panel with 1 call button (1321 + 9192); - 1 x button operated electronic unit with colour video camera and speech unit (13F5); - 1 x TAB series surface mounting monitor with 3.5" TFT LCD colour screen (7529); - 1 x power supply (6922).
* 7529/KD	As above, with video door entry unit prewired for hearing aid function
■ 6009/K1	Petrarca series b-&-w video door entry kit . Comprises: - 1 x 8000 series light grey flush wall mount entrance panel with 1 call button (RPC5 + RP01 + 9192 + 8092); - 1 x button operated electronic unit with colour video camera and speech unit (13F5); - 1 x Petrarca series surface mounting monitor with 3.5" b-&-w screen (6029+6209+6145); - 1 x power supply (6922).

■ **6329/KCI** Giotto series **colour video door entry kit.**

Comprises:

- 1 x 1200 series stainless steel flush wall mount entrance panel with 1 call button (1221 + 9192);
- 1 x button operated electronic unit with colour video camera and speech unit (13F5);
- 1 x Giotto series surface mounting monitor with 3.5" colour screen (6329/C);
- 1 x power supply (6922).

6329/KAC Giotto series **colour video door entry kit.**

Comprises:

- 1 x 1300 series anodized and electro-polished aluminium flush wall mount entrance panel with 1 call button (1321 + 9192),
- 1 x button operated electronic unit with colour video camera and speech unit (13F5);
- 1 x Giotto series surface mounting monitor with 3.5" colour screen (6329/C);
- 1 x power supply (6922).

6329/KA Giotto series **b-&-w video door entry kit.**

Comprises:

- 1 x 1300 series anodized and electro-polished aluminium flush wall mount entrance panel with 1 call button (1321 + 9192),
- 1 x button operated electronic unit with colour video camera and speech unit (13F5);
- 1 x Giotto series surface mounting monitor with 3.5" b-&-w screen (6329);
- 1 x power supply (6922).

6329/K1 Giotto series **b-&-w video door entry kit.**

Comprises:

- 1 x 8000 series light grey flush wall mount entrance panel with 1 call button (RPC5 + RP01 + 9192 + 8092);
- 1 x button operated electronic unit with colour video camera and speech unit (13F5);
- 1 x Giotto series surface mounting monitor with 3.5" b-&-w screen (6329);
- 1 x power supply (6922).

*

TERMINAZIONE

This note applies to all devices with "BUS termination connector or dip-switch", which is identified by the screen-printed letters "ABC" and marked on the wiring diagrams with *.

For correct adaptation of the line, make the setting according to the following rule:

- Maintain position "A" if the BUS enters and exits from the device;
- Move to position "B" (if Elvox cable) or to position "C" (if CAT5 twisted pair cable) if the BUS line terminates in the device itself.

- *A" = NO TERMINATION
- *B" = TERMINATION 100 Ohm
- *C" = TERMINATION 50 Ohm

INSTALLATIONS WITH PASSIVE DISTRIBUTOR 692D

ALWAYS use output 1 on distributor type 692D (the only one that has no termination jumper).

For termination of type 692D:

- If outputs "OUT", "2", "3" or "4" are not used, KEEP the jumper on the "TOUT", "T2", "T3" or "T4" connector.
- The default "TOUT" connector is in the "100" position (Elvox cable), position it to "50" only if using a CAT5 twisted pair cable.

INSTALLATIONS WITH ACTIVE DISTRIBUTOR 692D/2.

The termination jumper must be positioned on "B" (for Elvox cable) or on "C" (for CAT5 twisted pair cable) IF AND ONLY IF the BUS terminates at the device itself. It must be left on "A" if effecting entry-exit using terminals 1-2 on 692D/2.

MINIMUM CONDUCTOR SECTION (mm ²)	
TERMINALS	UP TO ... 10 m
ELECTRIC LOCK	1.5 mm ²
OTHER: -, +U, +I, -L (Ⓟ)	1 mm ²

(Ⓟ) ADDITIONAL POWER SUPPLIES TYPE 6923, 6582, 6982, MUST BE INSTALLED AS CLOSER AS POSSIBLE TO THE DEVICE THE GET CONNECTED TO.

- Move to position "B" (if Elvox cable) or to position "C" (if CAT5 twisted pair cable) if the BUS line terminates in the device itself.

"A" = NO TERMINATION
 "B" = TERMINATION 100 Ohm
 "C" = TERMINATION 50 Ohm

INSTALLATIONS WITH PASSIVE DISTRIBUTOR 692D

ALWAYS use output 1 on distributor type 692D (the only one that has no termination jumper).

For termination of type 692D:

- If outputs "OUT", "2", "3" or "4" are not used, KEEP the jumper on the "TOUT", "T2", "T3" or "T4" connector.
- The default "TOUT" connector is in the "100" position (Elvox cable), position it to "50" only if using a CAT5 twisted pair cable.

INSTALLATIONS WITH ACTIVE DISTRIBUTOR 692D/2.

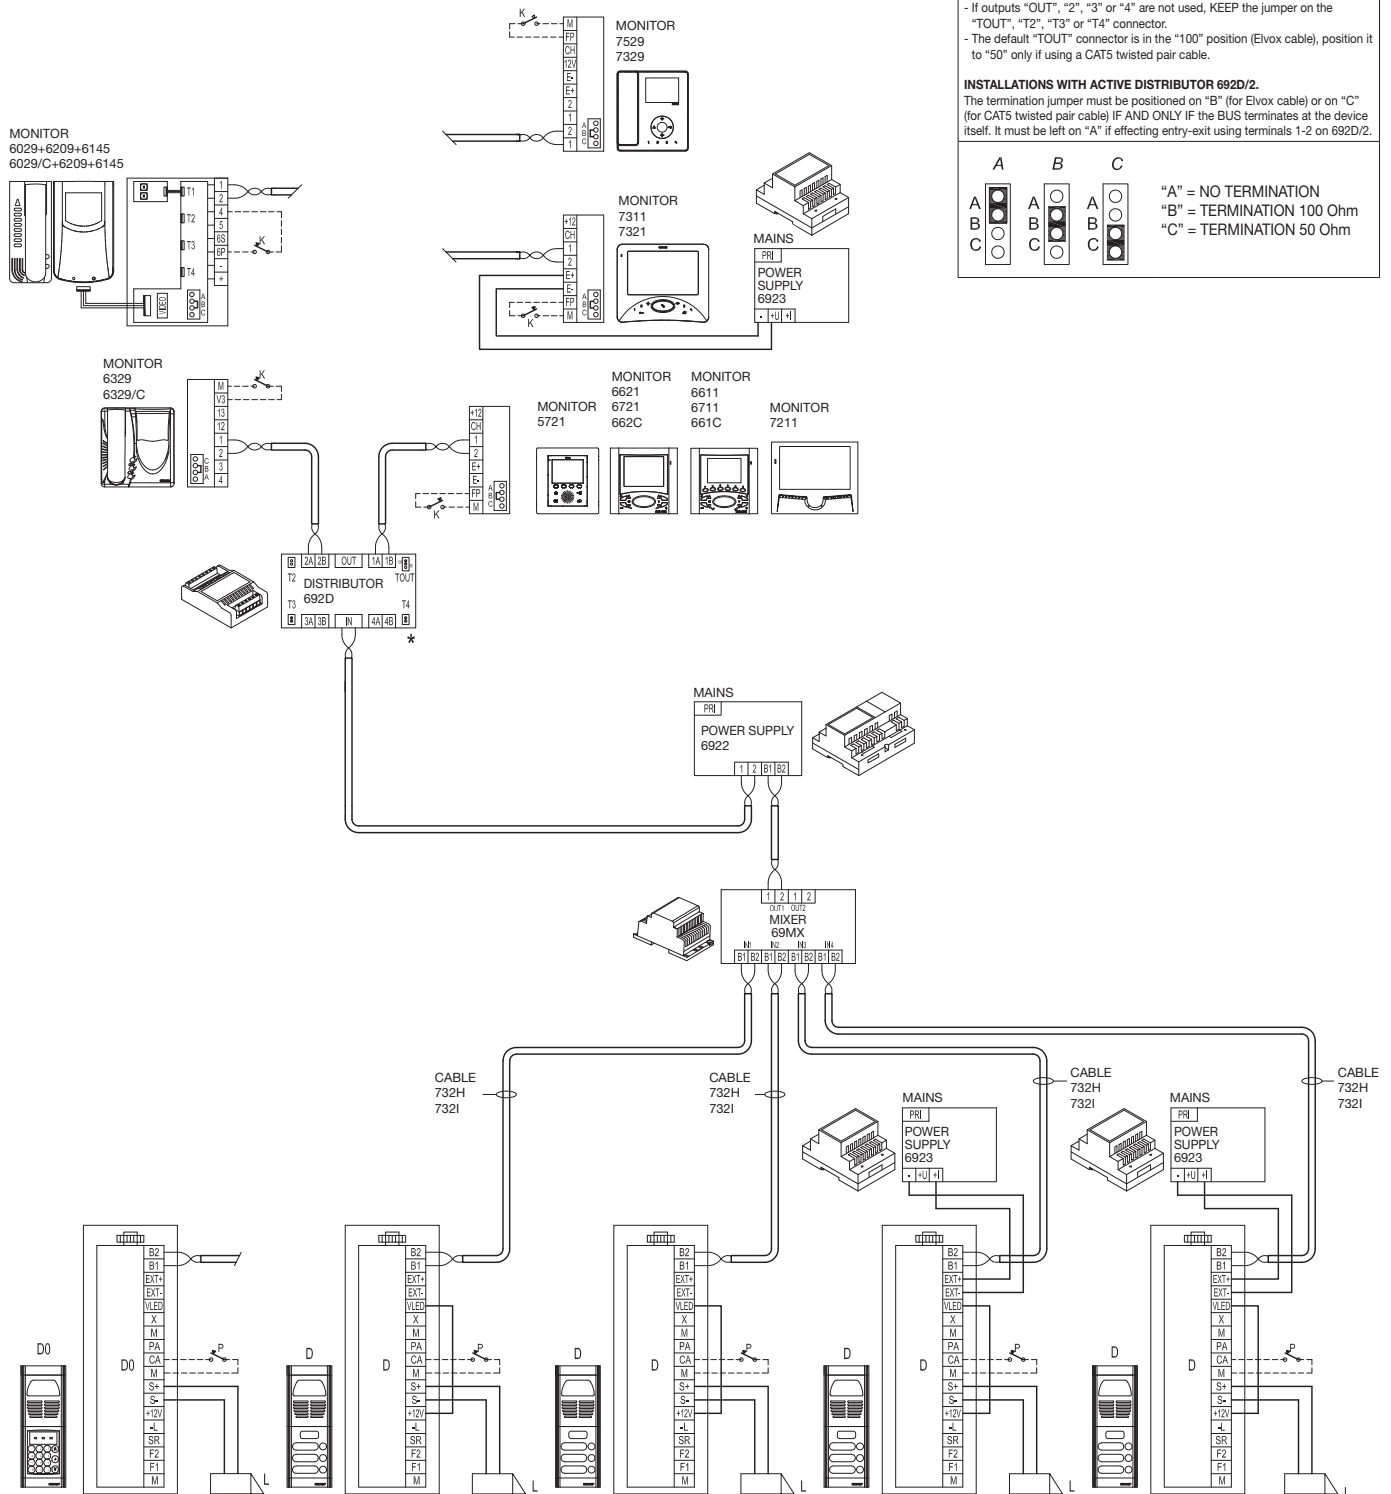

The termination jumper must be positioned on "B" (for Elvox cable) or on "C" (for CAT5 twisted pair cable) IF AND ONLY IF the BUS terminates at the device itself. It must be left on "A" if effecting entry-exit using terminals 1-2 on 692D/2.

Video system in building complex with multiple main and secondary entrance panels and riser splitter with more than 200 internal units

MINIMUM CONDUCTOR SECTION (mm ²)	
TERMINALS	UP TO ... 10 m
ELECTRIC LOCK	1.5 mm ²
OTHER: -, +U, +I, -L (β)	1 mm ²

(β) ADDITIONAL POWER SUPPLIES TYPE 6923, 6682, 6982, MUST BE INSTALLED AS CLOSER AS POSSIBLE TO THE DEVICE THE GET CONNECTED TO.

- C - Audio entrance panel with push button
Series 1200, 1300, 8000, Patavium, Letterbox
- D - Video entrance panel with push button
Series 1200, 1300, 8000, Patavium, Letterbox
- D0 - Alphanumeric video entrance panel
Series 1200, 1300, 8000, Patavium, Letterbox
- K - Outdoor call push-button
- L - Electric lock 12 V
- P - Open door command

*** TERMINAZIONE**

This note applies to all devices with "BUS termination connector or dip-switch", which is identified by the screen-printed letters "ABC" and marked on the wiring diagrams with *.

For correct adaptation of the line, make the setting according to the following rule:

- Maintain position "A" if the BUS enters and exits from the device;
- Move to position "B" (if Elvox cable) or to position "C" (if CAT5 twisted pair cable) if the BUS line terminates in the device itself.

- "A" = NO TERMINATION
- "B" = TERMINATION 100 Ohm
- "C" = TERMINATION 50 Ohm

INSTALLATIONS WITH PASSIVE DISTRIBUTOR 692D

ALWAYS use output 1 on distributor type 692D (the only one that has no termination jumper).

For termination of type 692D:

- If outputs "OUT", "2", "3" or "4" are not used, KEEP the jumper on the "TOUT", "T2", "T3" or "T4" connector.
- The default "TOUT" connector is in the "100" position (Elvox cable), position it to "50" only if using a CAT5 twisted pair cable.

INSTALLATIONS WITH ACTIVE DISTRIBUTOR 692D/2.

The termination Jumper must be positioned on "B" (for Elvox cable) or on "C" (for CAT5 twisted pair cable) IF AND ONLY IF the BUS terminates at the device itself. It must be left on "A" if effecting entry-exit using terminals 1-2 on 692D/2.
